**W**HEN the monarchs of Egypt erected those stupendous masses, the pyramids; for no other use but to record their names, and by which their purpose was not answered, they little suspected that a weed growing by the Nile would one day be converted into more durable registers of fame, than quarries of marble and granite. Yet when paper had been invented, what ages rolled away before it was destined to its best service! It is equally amusing to observe what obvious arts escape our touch, and how quickly various channels are deduced from a source when once opened. This was the case of the press: Printing

was not discovered till about the year 1430 : in thirty years more it was applied to the multiplication of drawings. Authors had scarce seen that facility of dispersing their works before painters received an almost equal \* advantage. To each was endless fame in a manner ensured, if they had merit to challenge it. With regard to prints, the new discovery associated the professors in some degree with the great masters whose works they copied. This intimate connection between painters and engravers makes some account of the latter a kind of necessary supplement to the history of the former. But if this country has not produced many men of genius in the nobler branch, it has been still more deficient in excellent engravers. Mr. Vertue had been

\* Want of colouring is the capital deficiency of prints ; yet even this seems attainable. Monsieur le Blon, who will be mentioned hereafter, invented coloured prints, and did enough to shew the feasibility. His discovery was neglected, as the revival of encaustic painting has been lately ; though the advantages of each art are so obvious and so desirable.

alike

alike industrious in hunting after monuments of the latter profession; he was of it himself; but as the artists were less industrious, his labour was by far more unsuccessful. 'Till the arrival of Hollar the art of engraving was in England almost confined to portraits. Vertue thought what was produced here before the reign of king James, of so little consequence, that in a sketch which he had made for a beginning, he professedly dates his account from the year 1600. If I take it up earlier, it is merely to give a compleat history, which will be comprehended in few lines, and the materials for which I have chiefly gathered from his papers, and from the *Typographical Antiquities* of Mr. \* Ames.

\* Joseph Ames, secretary of the Society of Antiquaries, was originally a ship-chandler in Wapping. Late in his life he took to the study of antiquities, and besides his quarto volume, containing accounts of our earliest printers and their works, he published a list in duodecimo of English heads, engraved and mezzotinto, and drew up the *Parentalia* from Mr. Wren's papers. He died in 1759. His library and prints were sold by auction in the following year.

Mr. Evelyn says \* the art of engraving, and working off from † plates of copper, did not appear till about the year 1490. That is, it was not brought to perfection from the hints gathered from typography: Yet it is certain that in 1460 Maso Finiguerra, a goldsmith of Florence, by an ac-

\* *Sculptura*, p. 35.

† I have said, and for two reasons, shall say little of wooden cuts; that art never was executed in any perfection in England: engraving on metal was a signal improvement of the art, and supplied the defects of cuttings in wood. The ancient wooden cuts were certainly carried to a great height, but that was the merit of the masters, not of the method. Whoever desires to know more of cutting in wood should consult a very laborious work, lately published in France in two vols. octavo, called *Traité historique & pratique de la graveure en bois*, par Papillon, Paris 1766. The author will not probably, as he wishes, persuade the world to return to wooden cuts; but he gives examples of vignettes to books in that manner, which ought to make editors ashamed of the slovenly stamps that are now used for the fairest editions. There is a curious account of missals, &c. adorned with wooden cuts, in Mr. Gough's *Brit. Topogr.* 2d. edit. in the articles of Wiltshire, from p. 319, to p. 362, vol. ii.

accident that might have given birth to the rolling-press, without the antecedent discovery of printing, did actually light upon the method of taking off stamps from an engraved plate. Casting a piece of such plate into melted brimstone, he observed that the exact impression of the engraving was left upon the surface of the cold brimstone, marked by lines of black. He repeated the experiment on moistened paper, rolling it gently with a roller. It succeeded. He communicated the discovery to Baccio Baldini, of his own profession and city. The latter pursued the invention with success, and engraved several plates from drawings of Sandro Boticello, which being seen by Andrea Mantegna, he not only assisted Baldini with designs, but cultivated the new art himself. It had not long been in vogue before Hugo da Carpi tried the same experiment with wood, and even added a variety of tints by using different stamps for the gradations of lights and shades; a method revived here some years ago with much success by Kirkall, and

since at Venice by Jackson; though very imperfectly.

From Italy engraving soon travelled to Flanders, where it was first practised by one Martin of Antwerp. He was followed by Albert Durer, who carried the art to a great height, considering how bad the taste was of the age and country in which he lived. His fidelity to what he saw was at once his fame and misfortune; he was happy in copying nature, but it was nature disguised and hid under ungraceful forms. With neither choice of subjects or beauty, his industry gave merit even to ugliness and absurdity. Confining his labours almost wholly to religious and legendary histories, he turned the Testament into the history of a Flemish village; the habits of Herod, Pilate, Joseph, &c. their dwellings, their utensils and their customs, were all gothic and European; his virgin Mary was the heroine of a Kermis. Lucas of Leyden imitated him in all his faults and was still more burlesque in his representations. It was not till Raphael had formed,

formed Marc Antonio, that engraving placed itself with dignity by the side of painting.

When the art reached England does not appear. It is a notorious blunder in Chambers, \* to say that it was first brought from Antwerp by Speed in the reign of James I. In some degree we had it almost as soon as printing; the printers themselves using small plates for their devices and rebuses: Caxton's Golden † Legend has in the beginning a groupe of saints, and many other cuts dispersed through the body of the work. It was printed in 1483. The second edition of his Game at Chess had cuts too. So has his Le Morte Arthur. Wynkyn de Worde, Caxton's successor, prefixed to his edition of the Statutes in the sixth year of Henry VII. a plate with the king's arms, crests, &c. a copy of which is given in the life of Wynkyn, by Mr. Ames in his *Typographical Antiquities*,

p. 79. The same printer exhibited several books adorned with cuts, some of which are particularly described by his Biographer, in pages 87, 88, 89, & sequentibus.

The subsequent printers continued to ornament their books with wooden cuts. One considerable work, published by John Rastell, was distinguished by prints of uncommon merit for that age. It was called *The Pastyme of the People*, and by bishop Nicholson in his Historical Library, *Rastell's Chronicle*. This scarce book, of a very large size, I saw at the auction of Mr. Ames's library; it had many cuts, eighteen of which were in great folio, representing the kings of England, so well designed and boldly executed as to be attributed to Holbein, though I think they were not of his hand. I shall mention but one more book with wooden cuts (though several are recorded by Ames). It is Grafton's *Chronicle*, \* printed in 1569, and containing many heads, as of William the Con-

quēror, Henry VIII. and queen Elizabeth, &c. Yet though even portraits were used in books, I find no trace of single prints being wrought off in that age. Those which I have mentioned in a \* former volume as composing part of the collection of Henry VIII. were probably the productions of foreign artists. The first book that appeared with cuts from copper-plates, at least the first that so industrious an enquirer as Mr. Ames † had observed, was, "The Birth of Mankind, otherwyse called, The Woman's Book," dedicated to the queen Catherine and published by Thomas Raynalde in 1540, with many small copper cuts, but to these no name was affixed. The earliest engraver that occurs was

THOMAS GEMINUS, or  
GEMINIE,

1545 } As he calls himself in a title-  
page which I shall mention pre-  
sently. The little that is known of him is  
collected from his works: Of these was

Thomæ Gemini Lyfienfis compendiosa  
totius Anatomæ delineatio, ære exarata,  
folio 1545. "These plates, says Ames,\*  
are some of the first rowling-press printing  
in England." This was a new edition of  
Vesalius's Anatomy, which was first pub-  
lished at Padua in 1542 with large wooden  
cuts, which cuts Geminus imitated on cop-  
per-plates; though, says Vertue, "I ques-  
tion whether more than the title-page, to  
which he has put his name, was the work  
of Geminus; the most and best part of the  
graved figures were probably copied from  
the wooden cuts in Vesalius by a better  
hand." The first edition was dedicated to  
Henry VIII. Geminus afterwards publish-

\* Ames, p. 218.

ed a translation by Nicholas Udal of the same work in 1552, and dedicated it to Edward VI. The translator in his preface says, "Accepte therefore, jentill reader, this Tractise of Anatomie, thankfully interpreting the labours of Thomas Gemini, the workman. He, that with his great charge, watch and travayle hath set out these figures in pourtrature, will most willingly be amended, or better perfected of his own workmanship, if admonished." Vertue having quoted this passage, owns, that the writing to all these plates was surely graved by Gemini; and probably some parts or members of the bodies. We do not contend for the excellence of Gemini's performances. It is sufficient, that we have ascertained so early an engraver in England. Vertue adds, that Gemini published another small work, with copper cuts, relating to midwifery two years before. I do not know whether he means two years before the first or the second of his editions of Vesalius. It is certain that Aines does not specify such a work, though in page 304, he acknowledges that there

there are books printed by Geminie of an earlier date than any he had seen ; for Geminie was not only an engraver but a printer ; and dwelled in Blackfriars. Thence he published a Prognostication, &c. relating to the weather, the Phænomena of the Heavens, &c. with a number of cuts. *Imprinted by Thomas Geminie, quarto* and another edition of his Anatomy in 1559, dedicated to queen Elizabeth.

So congenial an art as engraving, when once discovered, could not fail to spread in an age of literature. That accomplished prelate, archbishop Parker, who thought that whatever tended to enlighten and civilize the human mind, was within his province, seems to have been the most conspicuous patron of the arts in the reign of Elizabeth. I have mentioned before \* that he employed in his palace at Lambeth a painter and two or three engravers. Of these † the chief was

\* Anecdotes of Painting, vol. i. p. 278.

† Another was Richard Lyne, of whom see an account in Mr. Gough's Brit. Topogr. 2d. edit. vol. i. p. 208.

# REMIGIUS HOGENBERGH.

Of whom I can give the reader no farther information, than what he has received already, that Hogenbergh twice engraved the archbishop's head, which Vertue thought was the first portrait engraved in England; and a genealogy of the kings of England. Remigius had a brother, who either was in England or worked for Englishmen, his name

# FRANCIS HOGENBERGH;

1555 } By his hand is extant a print of queen Mary I. dated 1555; if this was executed in her reign it was antecedent to that of Parker: but it might not be done here, or might be performed after her death, and allude only to her æra. Under it is written, Veritas Temporis Filia. In the set of Saxton's maps he engraved those of Gaul and Picigium. Of his works abroad  
Vertue

Vertue had seen views in \* Bruin's *Civitates Orbis Terrarum*, printed at Cologne in 1572, in conjunction with Simon Novelanus and George Hoefnagle; and others in Abraham Ortelius's *Theatrum Orbis Terrarum*, in which he was assisted by Ferdinand and Ambrose Arsen, Antwerp 1570. The map of England in this collection was the work of Humphry Lhuyd of Denbighshire, as that of Spain was of Thomas Geminius, whom I have already mentioned. Engraving was on no contemptible foot in England when we had professors † worthy of being

\* This expensive work consists of two very large and thick folios; the first containing 108 plans and views of towns, the second 135. They are drawn and engraved by Francis and Abraham Hogenbergh, Hoefnagle, and others, particularly Henry Stenwick: the author styles himself both Bruin and Braun. It is a work of uncommon labour, but without method, and some of the cities are repeated. In this collection is the curious print of Nonfuch; and in the last plate but two of the first volume is a view of the lake Averno; Ortelius and G. Hoefnagle are standing by the lake, and from seeing birds swimming on it, hunc locum non esse Aornon advertentes.

† Ortelius himself commends the English engravers,

and

being employed to adorn Flemish editions ;  
Flanders was at that time a capital theatre  
of arts and learning.

**DR. WILLIAM CUNYNGHAM,**

1559 } A physician of Norwich, was also  
an author and engraver. In his  
Cosmographical Glasse, a true copy of which  
is described by Ames, ‡ are many cuts and  
a large map of Norwich, some of the plates  
engraved by the doctor's own hand. It  
was printed in folio in 1559, and dedicated  
to the lord Robert Dudley, afterwards the  
well-known earl of Leicester.

and besides those I have specified, he names Antony  
Jenkenfon, who flourished in 1562, and Robert Leeth,  
a man skillfull in taking the plot of a country. See  
Ames, p. 540.

‡ Ib. p. 237.

## RALPH AGGAS

1578 } Was a surveyor, and related to  
 Edward Aggas, a printer. \* Ralph published what I should have concluded a book, as he called it *Celeberrimæ Oxoniensis Academiæ, &c. elegans simul & accurata descriptio*; but Ames who is not very explicit, seems to speak of it as a map, saying it was three feet by four; and he adds that Cambridge was *done* about the same time, that is, in 1578. Aggas made a map of Dunwich in 1589, which I have mentioned, † and a large plan and view of London, which was re-engraved by Vertue, and of which in one of his MSS. he gives the following account :

“ A plan and view of London, with the river Thames and adjacent parts, being the most ancient prospect in print. This was reported to have been done in Henry VIII, or king Edward VIth's time; but from se-

† Anecdotes of Painting, vol. i. p. 267.

Several circumstances it appears to be done early in the beginning of queen Elizabeth's reign, about 1560; being cut in several blocks of wood. The prints thereof being now of the greatest scarcity, few copies perhaps preserved, being put up against walls in houses, therefore in length of time all decayed or lost. *Civitas Londinum*. Probably this was published by Ralph Aggas, as he himself mentions in that plan of Oxford, done after this was begun. But it must be observed that this very impression is a second publication, with the date 1618, and that there are several alterations from the first in this, and particularly, instead of the arms as queen Elizabeth bore them, those of king James I. (England, France and Scotland) are put in the place of them. And in the first have been explanations of the remarkable places in the city and suburbs, as may be observed in many places by letters of reference. The length of this printed plan, 6 feet .3 inches, by 2 feet 4 inches, contained in six sheets and two half sheets, I believe the full ex-

tent in length, but I apprehend the notes of explanation were at bottom printed on slips of paper to be added." Vertue then specifies buildings or absence of buildings which affix this plan to the æra in which he concludes it printed originally; as the water-gate at the palace of Westminster, called the *Queen's-bridge*; Northumberland-house wanting, which was not erected in 1560, but was before 1618. Paget-place, so called in 1563, &c. Vertue had taken much pains to ascertain the ancient extent of London, and the scite of it's several larger edifices at various periods. Among his papers I find many traces relating to this matter. Such a subject, extended by historic illustrations, would be very amusing. *Les Anecdotes des rues de Paris* is a pattern for a work of that kind; but not the last edition; for the author, conducted by the clue of his materials into the ancient histories of France and England, grew so interested in those obsolete quarrels, that he tacked to an antiquarian discussion a ridiculous invective against the English and their

their historians. After authenticating what ever has passed of memorable in each street of Paris, he labours to overturn all that happened at Poitiers and Cressy. Historian of gnats, he quarrels with camels.

HUMPHRY COLE,

1572 } A goldsmith, and probably brother of Peter Cole, a painter mentioned by Meres in his Wit's Commonwealth, and in the first volume of these Anecdotes; \* I conclude so, as Humphry engraved a map to a folio bible, which he set forth in 1572, and a frontispiece, with queen Elizabeth, the earl of Leicester as Joshua, and lord Burleigh as David. Humphry Cole, as he says himself, † was born in the north of England, and pertayned to the Mint in the Tower 1572. I suppose he was one of the engravers that pertayned to archbishop Parker, for this edition was call-

ed Matthew Parker's Bible. I hope the flattery to the favorites was the incense of the engraver!

## JOHN BETTES,

Brother of Thomas Bettes, the painter, was himself both painter and engraver. Meres in the *Passionate Pilgrim* above quoted is my authority for the first; Fox in his Ecclesiastical History tells us the second, naming John Bettes as the performer of a pedigree and some vineats (vignettes) for Hall's Chronicle, and speaking of Bettes in 1576, as then dead. † In the same place is mentioned one Tyrral, of whom I find no other account, nor of Cure, recorded by Meres; nor of his Christopher Switzer, ‡ but that he

† Ames, p. 197. in the note.

‡ In the Harleian Library was a set of wooden cuts representing the broad seals of England from the conquest to James I. inclusive, neatly executed. Vertue says this was the sole impression he had seen, and believed

he used to execute wooden cuts for books about the time of archbishop Parker.

## WILLIAM ROGER'S

Is another engraver in Meres's recapitulation of English artists. He engraved a title-page to Linschoten's Voyages to the East Indies; and probably the cuts to Hugh Broughton's Consent of Scriptures, which have this mark **WR**, and which Vertue says have been reckoned the first graved plates done in England. But this is a mistake; for Broughton's book was not printed till 1600.\* — He also did heads of Q. Eliza-

Heved that they were cut by Chr. Switzer, and that these plates were copied by Hollar for Sandford. Switzer also cut the coins and seals in Speed's History of Great Britain 1614, from the originals in the Cottonian collection. Speed calls him, *the most exquisite and curious hand of that age*. He probably engraved the botanic figures for Lobel's Observations, and the plates for Parkinson's Paradisus Terrestris, 1629. Chr. Switzer's works have been sometimes confounded with his son's, who was of both his names.

\* V. Ames, 429.

beth, of the earls of Essex and Cumberland, of Sir John Harrington in the title-play, his Orlando Furioso, of John Gerrard surgeon, and a frontispiece with four small heads. One Cure is also mentioned by Meres as an excellent Engraver, but I find no other account of him, nor ever met with any of his work. Laurence Johnson engraved several heads in the Turkish history in folio, 1603.

## CHRISTOPHER SAXTON,

1580 } To whom we are obliged for the first maps of counties, lived at Tingley near Leeds in Yorkshire, and was servant to Thomas \* Sekeford esq; master of Requests, and master of the Court of Wards. By the encouragement and at the expence of this gentleman Saxton undertook and published a compleat set of maps of the counties of England and Wales, many

of which he engraved himself, and was assisted in others by Remigius Hogenbergh, whom I have mentioned, by Nicholas Reynold, by some foreigners, and by Augustine Ryther, who made some of the maps of the Spanish invasion, and who kept a shop near Leaden-hall, and procured a translation of Petruscio Ubaldini's Discourse, which he dedicated to the lord admiral Howard in 1590. The county-maps, dedicated to the queen, and adorned with the royal arms, and those of the promoter, master Sekeford, were published by Saxton in 1579; the dates on different plates † showing, that the labour of six years, that is from 1574 to 1579, both included, had been bestowed on them. Saxton is commended by Camden and Thoresby, the latter of whom ‡ calls his map of Yorkshire *the best that ever was made of that county*. This rare map was

three feet wide ; at one corner was a view of York ; at another, of Hull. Augustine Ryther had the chief hand in engraving it.

## GEORGE HOEFNAGLE.

Of Antwerp, was probably in England, mention being made \* of a map of Bristol by him, and he certainly engraved a large plate of Nonfuch. He was one of the engravers employed by Ortelius. Vertue says that Mr. Green showed to the society of Antiquaries a quarto containing about fifty copper-plates, engraved in 1592 by James Hoefnagle of Francfort, aged then seventeen, from drawings by his father George of beasts, birds, flowers, insects, &c. †

\* Ames, p. 538.

† One Cock, a Dutchman, graved an oval portrait of the queen of Scots in 1559, and from a genuine picture, but it is not clear that he ever was in England.

THEODORE DE BRIE,

1587 } Was, ~~as~~ he informs us on his plates to Boissard's Roman Antiquities, a native of Liege and a citizen of Francfort. He engraved the plates for the first four volumes of that work, the last of which was completed in 1601 and 1602, after his death, by his sons Theodore and Israel, whom he brought up to his own business. His own head and Boissard's he has prefixed to some of the volumes. The first English work that I find with his name was the funeral procession of Sir Philip Sidney, of which I have given an account before, \* and which was expressly engraved in London. The next was † a title-page with the arms of the lord-keeper Hatton at large, to Wagenar's Mariner's Mirror, the second part, published by Antony Ashley in 1588. The last does great honour to De Brie: He cut the curious

plates, describing the manners and fashions of the Virginians in the brief and true report of the Newfoundland of Virginia, published by \* Thomas Hariot, servant of S<sup>r</sup> Walter Raleigh, and employed by him in the discovery. This work was printed at Francfort by J. Wechelius in 1590. The cuts were done at De Brie's own expence from drawings of ~~L. White~~, who was sent thither for that purpose. Picart has copied them in his Religious Ceremonies of all Nations; as Speed from drawings of the same person borrowed the frontispiece of his folio edition in 1611.† Theodore the father engraved the plates to the Latin Narrative of the Cruelties of the Spaniards in America, published in 1598. About the same time appeared De Brie's great work, intituled, Descriptio Indiae Orientalis & Occidentalis, 19 parts, 5 vol. folio. This is done much in the same manner with

Harriot's Account of Virginia. Theodore the younger engraved the heads for Boissard's Collection of eminent persons.

# ROBERT ADAMS,

Besides the plates which I have mentioned in the first volume of this work, p. 275, drew and engraved representations of the several actions while the Spanish Armada was on the British coasts. These charts were published by Augustine Ryther 1589.

I have now cleared my way to the æra from whence Vertue intended to date his account of our engravers; that is, from the last years of Elizabeth. Yet so unable had ~~he been to~~ amass materials sufficient to be moulded into a history, that I find only brief notes till we approach to modern times. The satisfaction therefore that I cannot give to the antiquary, must be a little compensated by assisting collectors. In default of anecdotes, I shall form some, however imperfect, lists of the works per-

formed by the elder masters. These will be chiefly supplied from my own collection and from \* Ames's printed catalogue of English heads, and may be increased hereafter by curious persons, who will be assisted by this sketch to compile a more extensive and compleat history of the art in England.

### † REGINALD ELSTRACKE,

Whose works are more scarce than valuable, flourished under Elizabeth and her successor, in whose reign he probably died. His first print according to the date is the portrait of

Sir Philip Sidney, done probably soon after his death.

Queen Elizabeth, done after her death.

Edward IV. King of England, with devices, &c. and are to be sold by Thomas Geele at the Dagger in Lombard-street. As there is no date to this print, it is uncertain in what year it was done. Vertue in one of his MSS. says, that Thomas Hind in 1537, was the first printseller in London; in another place he assigns that rank

to

to George Humble ; he no where mentions Geele. It is certain that the name of George Humble is frequently found on prints of the time of Elizabeth, in conjunction with John Sudbury ; they lived in Pope's-head-alley ; but Hinde and Geele were most probably their predecessors.

Toby Matthews archbishop of York, eight Latin verses, R. E. sculps. He. Holland excudit. are to be sold by George Humble in Pope's-head-alley.

I have a labour-ed print by him of Robert earl of Essex, with his arms, crest and titles. The print of Mary is much superior to many of the preceding.

\* G. Humble was also a painter. Among Ames's heads, p. 145, is one of Speed, D. Georgius Humble

p. G. Savery sc.

Henry Holland, who published the \* *Heroologia Anglicana* was eldest son of Philemor Holland, and I suppose brother of this Compton Holland. In 1613 he travelled into the Palatinate with John lord Harrington. Besides the *Heroologia*, he published *Monumenta sepulcralia Ecclesiæ S. Pauli* Lond. quarto; and a volume containing the heads of the kings of England from the conquest to the year 1618. These plates, says Vertue, are the same with those in Martin's Chronicle, except the title-page, and the print of William I.

Worked at the same time with Elstracke, and in the same manner, but ~~better and~~

\* The engraver of those prints has not set his name to them. As they are in a more masterly and free style than cuts done in England at that time, it is probable that Holland carried over the drawings with him, and had them executed abroad; and this will be confirmed by a circumstance I shall mention in the article of Crispin Paſs.

\* Jenner attempted the art himself with no bad success. I have a small print by him of Sir William Wadd [or Waad] lieutenant of the Tower. Sir William was son of Sir Armigel Wadd of Yorkshire, clerk of the council to Henry VIII. and Edward VI. and author of a book of travels. The son was clerk of the council to Elizabeth, who dispatched him to Spain to excuse her sending away their minister Mendoza, who had been dealing in treasons against her. Sir William behaved with great spirit there, and with as much cleverness afterwards in piecing together a treasonable paper, torn and thrown into the sea by one Chreiston. Wadd was successively ambassador to the emperor Rodolph, to Henry IV. and to Mary queen of Scots, inspector of the Irish forces, of the privy council to king James, and lieutenant of the Tower, from which post (to his honour) he was removed in 1613 by Robert Carr earl of Somerset, Sir William being a man of too much integrity to be employed in the dark purposes then in agitation. He died at his manor of Battiles Waade [where he built the mansion still standing] in 1623, aged 77. He married Anne daughter of Sir John Hyron. His father Sir Armigel, who lies buried at Hamstead, was the first

well. A whole length. Long tunic, H. K. on his breast a chain, and a horn in his hand. Behind him buildings and boys playing. Eight English verses.

Henry VIII.

Queen Mary I. in oval frame.

Sir Thomas Gresham, ditto, with gloves in his hand, large purse to his girdle. Francisco Delaram sculpsit. are to be sold by Jo. Sudbu. and G. Humble.

Queen Elizabeth, after her death, with a long inscription. V. Ames, p. 62.

James I.

Henry prince of Wales, son of James I. in the robes of the garter, with a aruncheon.

James Mountagu, bishop of Winchester, 1617, are to be sold by P. Stent.

Arthurus Severus O'Toole Nonesuch, ætatis 80, 1618. An old man with a large beard, a sceptre in his hand with eleven crowns upon it. Eight English burlesque verses. Seems to be the effigies of some adventurer.

Englishman that made discoveries in America. See Camden, The English Worthies, Ant. Wood, and Hist. and Antiq. of Essex.

Henry

Henry Percy earl of Northumberland;  
almost bald, and with very thick beard.  
Eight English verses, 1619, are to be sold  
by G. Humble in Pope's-head-alley.

Another, younger, but with a long beard  
and hat on.

Small next half-length of W. Burton of  
Falde, in an oval, with devices, 1622.

Sir Henry Mountagu, chief justice of the  
King's-bench, with six Latin verses, &c.

Sir William Segar, garter principal king  
at arms.

John Abbot, bishop of Salisbury, with six  
Latin verses, Abra. Car. compos.

John bishop of Lincoln, with purse-bear-

musical instruments, and six Latin verses.  
A very neat and curious print.

Frederick elector Palatine.

Elizabeth, his wife.

Frederick Henry, their eldest son.

Charles prince of Wales.

John King bishop of London.

Mathias de Lobel, physician.

Sir Horatio Vere; on either side a soldier

completely armed at bottom; trophies, &c. at top.

George Withers, the poet, with eight English verses, and this motto

*Nec habeo, nec careo, nec curo, 1622.*

Frances Duchefs of Richmond and Lennox, covered with jewels, a large veil behind. *Constantia coronat. 1623.*

Frontispiece to Nero Cæsar, folio, 1624. This is the latest date to which I find De-laram's name. The four next were a family of artists, and the best performers in the laboured finical manner of that age.

## C R I S P I N P A S S,

Of Utrecht, was a man of letters, and not only industrious to perfect himself in his art, but fond of promoting and encouraging it. This appears particularly by his being at the expence of setting forth Holland's Heroologia, which is expressly said to be published Impensis Crispini Pass, and his not mentioning himself as having any share

share in engraving the plates, makes me conclude that he recommended the best sculptors among the Flemish. Indeed the prints have merit in themselves, besides being memorials of so many remarkable personages. Crispin frequented and studied the best masters, and was sent by prince Maurice to teach drawing in an academy at Paris. At what time he came to England is not clear; none of his works done here are dated, says Vertue, later than 1635, yet he certainly lived some years longer, as in 1643, being then probably very old, he published his book at Amsterdam, *Della Luce del dipingere & disegnare*, in Italian, French, high and low Dutch, folio. In the preface he relates these circumstances of his life, "Des ma jeune age je me suis adonné à plusieurs & divers exercices; mais je me suis particulièrement attaché à estudier avec les plus fameux maîtres, le sieur Freminent, peintre de sa majesté tres Chretienne, le renommé peintre & architecte sieur Petro Paul Rubens, Abr. Bloemart, Paulo Morelson, peintre et architecte de Utrecht—mais plus

particulierement le tres noble seigneur Van-der Burg, avec lequel je visitay l'academie, ou estoient les plus celebres hommes du siecle. L'illustre prince Maurice de heureuse memoire m'envoya a Paris pour enseigner le dessein à l'academie du sieur Pluvinel, premier ecuyer du roy." He begins with a little geometry, gives directions for the proportions of the human body, for figures in perspective, for drawing in the academy by lamp-light, describes the use of the manekin or layman for disposing draperies, and goes through the proportions of horses, lions, bears, leopards, elephants, sheep, cats, and other quadrupeds, birds and fishes. His human figures are taken chiefly from Rubens, as is but too evident in the corpulency of his women. Some plates are after Lanfranc, and most of the animals from Roland Savery. The first division contains thirty plates, the second, seven, and the third, eleven of perspective. Among these are three cuts by his son, William, cum privileg. du roy tres Chretien. Bleau published a second edition of this work, and

and to swell the volume, added a great number of old plates, that belonged to other books. Some of the plates have these designations; Robert de Vorst inv. R. de Vorst incidit. R. Vandervorst. Except the list of his works, I have nothing more to add to Crispin's article, but that Pezham, in his *Complait Gentleman*, styles him, "My most honest loving friend."

His next work is indeed very beautiful, being a large set of plates for a folio, intitled, *Instruction du Roy en l'Exercise de monter a Cheval*, par Messire Antoine de Pluvinel, the person mentioned in the preface to his drawing-book. The work, which is in dialogues, and foolish enough, is in French and Dutch; adorned with many cuts admirably designed and executed. The young king Lewis XIII. Pluvinel, the duc de Bellegarde, grand ecuyer, and others of the court, appear in almost every print; and towards the conclusion are some plates exhibiting tilts at the barriers; in which are given portraits of all the great persons of the court at that time, delivered, though very small,

small, with great exactitude. This valuable book is little known, though ~~not very~~ scarce.

Queen Elizabeth, „ a most sumptuous whole length, with crown, sceptre, globe, farthingale, royal arms, bible and sword on a table, carpet and curtain, and twelve Latin verses. Isaac Olivier effigies, Crispin vande Passe incidēbat, procurante Joanne Waldnelto. This last circumstance, and the paucity of English heads engraved by Crispin, make me doubt whether he ever was in England himself: Perhaps drawings were sent to him, as they have been of late to Houbraken for the illustrious heads.

A head of the same queen, oval. Among her titles is that of Virginia.

James I. in hat and ruff, ~~within~~ within a square frame; lion and grifon supporting it. Six Latin lines. Crispin de Pass excudit Coloniae. Joannes Meyssens excudit Antwerpiae. As Pass executed this abroad, it is not extraordinary that he should have continued queen Elizabeth's grifon, not knowing that James on his accession had assumed the Scottish supporter. This print

is well done, though inferior to the preceding whole length.

Anne of Denmark, a curious print; she is drawn in her hair, young, and with a very broad square powdered ruff. Six Latin verses. Crispin de Pass f. & excudit Colonia.

Henry prince of Wales.

Charles prince of Wales, in an oval like the two last. Four Latin verses.

Ludoica Juliana Comes Nassoviæ, &c. in a round.

Sir Philip Sidney.

The earl of Essex on horseback.

Thomas Percius, nobilis Anglus, conspirationis A. MDCV. initæ princeps. C. van de Pass exc. See a description of this rare print in Ames, p. 134. There is also a print in quarto of the seven conspirators.

A collection of 200 emblems for George Wither.

A set of cuts for Ovid's *Metamorphoses*, the title of which is, Pub. Ovidii Nasonis xv. *Metamorphoseon librorum figuræ elegantissimæ à Crispino Passæo laminis æneis incisæ*, 1607.

Four.

Four large and handsome prints of Dives and Lazarus. The first only is executed by the father; the rest are by a younger son, called Crispin & wife, as is the following,

Frederic elector Palatine, young, oval, size of a large octavo, with martial trophies. Crispin P. scæus un. figu. & sculp. The other children of Crispin Pass were

Who engraved a very rare print, which the earl of Oxford bought with the collection of Sir Simonds Dewes, and of which Vertue gives this account: It was a printed sheet, containing the family of James I. and intitled, Triumphus Jacobi regis augustæque ipsius prolis. The king sitting on his throne with his regalia; on his right the queen and prince Henry leaning on skulls, to intimate they were dead; on his left prince Charles with his hand on a book, that laid on a table; an angel above holding two crowns. Near prince Charles stand the king and queen

queen of Bohemia, and before them their seven children. At the bottom of the sheet several Latin and English verses. W. G. scripsit. Will. Pass scripsit. illustris. Jaco. R. Principique Carolo D. D. eorumque licentiâ & favore excu. Joar. Bill.\*

In another place Verſue describes a similar print, but does not say where he saw it. The latter is intituled, The progenie of the renowned prince James king of Great Brittain, France and Ireland. The verses in both languages are different from those in the preceding; to the latter it is said, hæc composuit Johannes Webster; and the engraver is George † Mountain. To be sold

\* This beautiful and curious print (probably the very proof that was lord Oxford's) is now in my possession: I bought it at the sale of Sir Charles Cotterel's library in 1764, in the London edition of Thuanus, which is also adorned by general Dormer and Sir Clement Cotterel, with several other fine and scarce prints, particularly one of Henry IV. Marie de' Medici; their children and nurses; and the print of the three Coligis, which I have mentioned in the life of Isaac Oliver.

† I find but one other print with his name, and that a poor one; it is of Francis White, dean of Carlisle.

at the Globe over the Exchange, I suppose that plate was copied from that of Pafs.

Another print recorded by Vertue contains in a half sheet the king and queen of Bohemia, and four of their children. Will. Pafs fecit ad vivum figurator 1621. About twenty English verses in two columns at bottom.

I have a very valuable print of the Palatine family on a large sheet, broadways, but without any name of engraver. By the manner I should take it for Sadeler. The king of Bohemia, aged, fat, and melancholy, is sitting with Elizabeth under some trees. One of their sons, in appearance between twenty and thirty, stands by the queen. On the other side are three young children, the least playing with a rabbit. Two greyhounds, a pigeon, a toad, and several animals are disposed about the landscape, which is rich, and graved with much freedom. The inscription is in French.

Of William Pafs I find these other works;

\* This print, exceedingly inferior to the former, is now in the collection of Sir William Musgrave, who bought it, with many other scarce portraits, from Thoresby's Museum in 1764.

Robert earl of Leicester, head in oval, good, two Latin verses <sup>P</sup><sub>W</sub> fe.

Frances duchess of Richmond and Lenox, half-length, extremely neat, her arms in a shield, on a table lies a book with these words, *Constantia coronat*. Over her a state. Anno 1625 insculptum à Guilh. Passeo Londinum. This print, which is in my possession, resembles very much a whole-length (I believe by Mytens) of the same great lady, which I bought from the collection of the late earl of Pomfret. There is another of her in her \* weeds with the duke's picture at her † breast at Longleat. But the best portrait of her is in Wilson's Life of James I. The reader

\* Mr. Masters, author of the History of C. C. C. Cambridge, has another of these.

† This was the fashion at that time. There are three or four ladies drawn so by Cornelius Jansen, at Sherburn-castle, the lord Digby's; of which Elizabeth countess of Southampton, a half-length richly attired, is one of Jansen's best works. The ruins of the bishop's castle, Sir Walter Raleigh's grove, the house built by him and the first earl of Bristol, the siege the castle sustained in the civil war, a grove planted by Mr. Pope, and the noble lake made by the last lord, concur to make that seat one of the most venerable and beautiful in England.

would find it well worth his while to turn to it.

Sir John Haywood, L. L. D. died 1627, with emblems. W. Pafs, f.

Robert earl of Essex on horseback.

George duke of Buckingham, ditto.

Christian IV. king of Denmark, and Frederick duke of Holstein both standing in one print.

Darcy Wentworth, æt. 32, 1624..

James I. crowned, and sitting with a sword in his right hand, on which, Fidei Defensor, a death's head on his left on his knee; before him prince Henry with his left hand on a skull on a table. W. Pafsæus f. & sc. anno domini 1621.

Another with the same date, but the king's left hand is on the globe, not on a skull; and instead of prince Henry, there is prince Charles. This fine print is in my possession.

Sir Henry Rich, captain of the guards, oval frame. W. Pafs, sc.

## MAGDALEN PASS,

I find little of her work but a very scarce little head in my own collection, representing the lady Katherine, at that time marchioness, afterwards duchess, of Buckingham, with a feather fan. It is slightly finished; but very free. Salmacis and Hermaphroditus, 1623; Cephalus and Procris; and Latona changing the Lycian peasants into frogs, both after Elsheimer.

## SIMON PASS

Engraved counters of the English royal family, as I have already mentioned in the life of Hilliard. Vertue says, he staid here about ten years, and then passed into the service of the king of Denmark, his earliest works in England being dated 1613. Mr. Evelyn in his *Sculptura*, p. 88, adds, that *Liberum Belgium* by Simon de Pass, dedicated

cated to prince Maurice of Nassau, is a very rare cut. Other prints by him are,

James I. crowned, sitting in a chair; prefixed to his works.

. Ditto, with a hat.

Queen Anne, 1617.

Ditto, on horseback, with a view of Windsor-castle behind.

Prince Henry with a lance, life length.

Philip III. king of Spain.

Maria of Austria, his daughter, the intended bride of Charles I.

Another of her, as sister of Philip IV. much neater. Four Latin verses. Sim. Pafs, sc. Crispin de Pafs (I suppose the younger brother) exc. 1622.

George Villiers, earl of Buckingham, 1617.

Another of him when marquiss, 1620, to the knees, standing by a column in a chamber. Angels and festoons of fruit.

Charles I. young (when prince) in the robes of the garter.

Henry earl of Northampton. I never saw this print.

Francis

Francis Manners earl of Rutland.

Sir Walter Raleigh, in an oval, arms and devices. Sim. Pass sculps. Comp. Holland exc.

Archbishop Abbot, ditto, with a view of Lambeth. Pass and Compton.

Another, 1616, Lond. but without Lambeth, and Holland's name.

Thomas earl of Arundel (the great collector) oval, arms. Michael Jans. Mirevelt pinx. and Sim. Passæus sculps. L. Compt. Holl. excu.

William earl of Pembroke, do. white staff, arms. Pa V. Somer pinx, 1617. To be sold by Jo. Sudbury and G. Humble. And Philip earl of Montgomery, do.

Richard earl of Dorset, do. sold in Pope's-head-alley.

Frances Howard countess of Somerset, a curious print of a curious person. It is a \* small oval, the hair very round and curled, like a wig, ruff. S. Pa: sculp.

\* Ames, p. 162, mentions another very like this, but with some few variations.

Lon. Comp. Holl. exc. I have a print likewise of her husband, by the same, and a miniature of him in his latter age by Hopkins. In both, his face is a sharp oval, and his hair fair: Proofs that the print given of him among the illustrious heads, which is a very robust black man, is not genuine.

William Knolls viscount Wallingford, in an oval, with a hat like lord Bacon. I am not certain by which Pass, I believe by Simon.

James Hay baron of Saley, afterwards earl of Carlisle; graved by Pass, and sold by Sudbury and Humble.

John King bishop of London, oval, twelve Latin verses. Nicolà Lockey pinx. fieri curavit, and Simon Passæus sculpsit.

Lancelot Andrews bishop of Ely, 1618. Qu. by which Pass?

I have a small neat head in an oval of Christina Popping, in a Flemish dress, dedicated to her in a Latin inscription, and with a French motto, and a verse from Ovid, executed in 1615. By this one should conclude he was not yet arrived.

Sir

Sir Edward Coke, with six Latin verses.

Another of Sir Walter Raleigh.

Sir Thomas Overbury. Veneno obiit  
1613. Comp. Holl. exc.

Another, smaller.

William Butler, physician, good.

\* Court Gondomar; dedicated to him,  
and strongly touched. These five last are  
ovals.

Another larger, with arms, Cupids, trophies, &c. very fine. Some of the following I take from Ames. The pages refer to his book.

A monumental plate, inscribed by John Bill to his wife Anne, p. 23.

Lucy Harrington countess of Bedford, the patroness of Donne and other wits of that age; p. 28.

Edward VI. p. 63. and James I. p. 89.  
Two more of the latter.

Queen Elizabeth, whole-length.

Lord Chancellor Egerton.

Ant. Pluvinel Eques, 1623.

James Montagu bishop of Winchester.

\* There is another in folio 1622.

John Arnd, a German divine.

Matoaca, alias Rebecca, filia pōtentifs.  
 princ. Powkatavi imp. Virginix, æt. 21;  
 1616.

A woman's head, 1616.

Sir Henry Hobart.

Sir Edward Cecil, afterwards lord Wim-  
 bledon.

Digby earl of Bristol.

Large head of Christian IV.

Captain John Smith, 1617.

Title to lord Bacon's works.

Andreas Rivetus.

Antonius Walæus.

Robert Sidney viscount Lille, afterwards  
 earl of Leicesters, p. 103.

Charles earl of Nottingham, lord high  
 admiral, p. 122.

Aaron Rathborne, p. 142.

Sir Thomas Smith, ambassador to Russia,  
 p. 155.

Mary Sidney countess of Pembroke, sister  
 of Sir Philip Sidney, for whom he wrote  
 the Arcadia, p. 161. She was old when this  
 print was done.

Henry

Henry Wriothesly earl of Southampton ;  
the friend of lord Essex, p. 177.

Edward Somerset earl of Worcester, p. 181.

— William Burton, physician, 1620.

In the French king's library at Paris is a large collection of the works of Crispin Pass and his family in two or three large volumes. One Emanuel Passe is mentioned in this work (vol. ii. p. 10.) as included in a licence to Cornelius Jansen to go abroad.

J O H N P A Y N E,

Was scholar of Simon Pass, and the first Englishman that distinguished himself by the graver. Had his application been equal to his genius, there is no doubt but he would have shined among the first of his profession; but he was idle, and though recommended to king Charles, neglected his fortune and fame, and died in indigence before he was forty. There is a thin volume in octavo, called Good-friday, containing meditations

on that day, and printed in 1648, to which are annexed some poems, under the title of *Calanthe*, by T. Rawlins. Among them is an epitaph on John Payne, then lately deceased. Mr. Evelyn \* mentions him with applause; "Yet had we a Payne for his ship, some heads to the life, especially that of Dr. Alabaster,† Sir Benjamin Rudyard, and several other things." The ship was a print of the Royal Sovereign built in 1637 by Phineas Pett. It was engraved on two plates joined, three feet long, two feet two inches high. The head of Dr. Alabaster I have, and it truly deserves encomium; being executed with great force, and in a more manly style than the works of his master. It was taken from a painting by Cornelius Jansen. He did besides a storm, some plates for books, and these heads;

Hugh Broughton, oval, 1620, with six Latin verses; very inferior to the preceding.

Alderman Leate, oval, with verses.

\* *Sculptura*, p. 98.

† This is one of his best.

1. Roger Bolton, ditto, with four Latin verses, 1632.

Sir Edward Coke, chief justice, 1629.

Mr. Hobson, the Carrier, with eight English verses.

Christian duke of Brunswick, &c. trophies; four English verses.

Robert Devereux (2d) earl of Essex; hat and feather; J. B. neat little square print.

Henry Vere Earl of Oxford, still better. It is a square in the middle of a larger print by W. Pats, in which, at top, bottom and sides, are soldiers exercising, or holding banners with mottoes.

Carolus Ludovicus Princeps elector; a mere head, without even the neck.

Algernon Percy earl of Northumberland, in the same manner.

1 Elizabeth countess of Huntingdon.

Dr. Smith, of St. Clements Danes, M. D.

Henry VII. Henry VIII. count Mansfeld; bishop Hall; bishop Lake; bishop Andrews; Sir James Lev. chief justice; George Withers, the poet; Richard Sibbs; Ferdinand of Austria; Shakespear; John Preston; Mr. Arthur Hilderham; William Whitaker; Francis,

cis Hawkins, a boy; and these particular title-pages: to the Guide to Godliness; to the works of John Boys; to Christian Warfare; to God's Revenge against Murder; and to *La Muse Chrestienne*, du Sieur Adrian de Rocquigny, 1634.

Of what country I know not, appears to have engraved these pieces,

Lodowick duke of Richmond and Lenox,  
1624.

A title-plate, 1624.

Another, 1632.

A man's head, something like a bust, oval ornament; two figures representing painting and literature, 1622.

There were many other engravers in the reign of James I, with whose private story we are so little acquainted, that it is impossible to ascertain their several ages and  
prece-

precedence. I shall give them promiscuously as they occur.

## . JOHN NORDEN.

1603 } In Mr. Bagford's collection was a view of London published by Norden in 1603,\* at bottom a representation of the lord-mayor's shew, with variety of habits. In the same person's possession Vertue saw another plan of London by T. Porter, in which he observed these particulars : at the upper end of the Hay-market was a square building called Peccadilla-hall ; at the end of Coventry-street, a gaming-house, afterwards the mansion and garden of the lord keeper Coventry ; and where Gerard-street is, was an artillery ground or military garden made by prince Henry. Norden seems to have been only a topographical engraver : he is known by his *Speculum Britannicæ*, or *Historical and Chorographical*

\* In that year 1603 one Laurence Johnson graved several heads for the Turkish History.

Description of Middlesex and Hartfordshire, with a neat frontispiece and maps. Antony Wood conjectures with great probability that he is the same person with the author of several tracts which he enumerates, and thinks he was born in Wiltshire, and adds that he was a commoner of Hart-hall, Oxford, in 1564, and took the degree of master of arts in 1573, that he lived at Hendon near Acton in Middlesex, was patronized by, or servant to lord Burleigh and his son Robert earl of Salisbury, and that he was a surveyor of the king's lands in 1614. Vertue subjoins that one Charles Whitwell made a map of Surrey for Norden, which was neater than his other maps. He mentions also a large title-plate for the English Bible, inscribed C. Boel fecit in Richmond, 1611. In Rymer's Fædera, vol. xvii. is a patent granted in 1618 to Aaron Rathburne and Roger Bruges, for making a survey for a true and perfect description of the citie of London and Westminster, in a map; and also several other cities.

**WILLIAM HOLE or HOLLE**

1613 } Engraved an oval head of Michael Drayton in 1613, a poor performance; and a head of Joannes Florius, Italian master to Anne of Denmark, See Ames, p. 68. And, those of George Withers, Michael Drayton, Tom Coryat, John Hayward, and a very neat whole length of prince Henry, for Drayton's Polyolbion. He also published a copy-book, called The Pen's Excellencie by Martin Billingsley. The second edition with the picture of the letter has 28 plates, 1618.

**JODOCUS HONDIUS,**

Of whom I have given some account in the third volume, under the article of his grandfather Abraham, was son of Oliver De Hondt, an ingenious artist of Ghent, where probably Jodocus was born in 1563, and where he studied the mathematics, and the Latin

Latin and Greek tongues. The city of Ghent being delivered up when Jodocus was twenty years old, he came to England, and exercised various arts, as making mathematical instruments, types for printing, and engraving charts and maps. Among these were Sir Francis Drake's voyages, the Holy-land, the Roman Empire and divers others. His Celestial and Terrestrial globes, the largest that had then been published, were much commended. Several of Speed's\* maps were executed by his hand; and he had great share in the † Atlas Major of ‡ Gerárd Mercator, which was finished by his son Henry, and published at Amsterdam in 1636. A translation of it by Henry Hexam quarter-master to Col. Goring was dedicated to Charles I. Besides these and some things which I have mentioned in the life of his Grandson, Jodocus engraved a small print of Thomas Cavendish, the famous sailor, another of Queen Elizabeth, a

large sheet print of Sir Francis Drake, another smaller, and a head of Henry IV. of France. He married in London in 1586, and had several children; but removing to Amsterdam, he died there in 1611, being then ~~but~~ 48 years of age. His son

## P E T E R   S T E N T

Was, I believe, an engraver, certainly a print-seller. On a portrait of the king of Bohemia is said, Sold by Peter Stent. To one of the above-mentioned Francis White, but engraved by G. Mountain, is P. Stent excud. as is to a cut of Sir James Campbell lord-mayor in 1629, but to one of Andrew Willet with six Latin verses, are the letters P. S. who probably cut the plate, as no other artist is mentioned. Stent certainly lived so late as 1662, for in that year, as he had done in 1650, he published a list of the prints that he vended, which list was reprinted by Overton (who bought his stock) in 1672. In the first catalogue were mentioned plates of London, St. James's, Non-such, Whitehall, Wanders, Oatlands, Hampton-court, Theobalds, Westminster, Windsor, Greenwich, Eltham, Richmond, Woodstock, Basinghouse; battle of Naseby, two fleets, with general Ludlow on horseback; two more of the battle of Dunbar; all now  
9 extremely

extremely scarce, and the more valuable as many of the edifices themselves no longer exist. Nonfuch, that object of curiosity, is commonly known only by the imperfect and confused sketch in one of Speed's maps, but there is a large and fine print of it, by G. Höefnagle, in the first volume of Braun's *Civitates Orbis Terrarum*. Of\* Old Richmond and Greenwich I have drawings; and of the former is a small view by Hollar. In Overton's list is mentioned a map of the Royal-exchange by Thomas Cartwright, the builder.

\* At the lord viscount Fitzwilliams's on Richmond-green, are two very large pictures, which came out of the old neighbouring palace: they are views of that palace, and were painted by Vinckenboom, who I never knew was in England. The landscape in both is good, and touched in the style of Rubens; the figures are indifferent, the horses bad. In the view to the green is a stag-hunting: in the other morrice-dance and a fool collecting money from the spectators. By the dresses they appear to have been painted about the latter end of James I. or beginning of Charles, for some of the ruffs are horizontal, some falling on the breast, which latter fashion was introduced at that period. There appears to have been a pretty detached chapel, which is not in Hollar's view, and a boarded gallery to the ferry.

WILLIAM

WILLIAM DOLLE,

A name that occurs to a\* neat little print of Sir Henry Wootton, with the word philosophemur; and to those of Marc Francke master of Pembroke-hall, Cambridge; of John Cosin bishop of Durham; of Samuel Boteley; of the duke of Buckingham; of Sanderfon bishop of Lincoln; of Milton, Hooker, and the earl of Essex.

A name to a print of Sir Theodore Mayeme. An Italian called Deodate, was physician to prince Henry, and probably this engraver.

\* This head of bishop Reynolds was probably engraven while he was only rector of Braunton in Northamptonshire, of which he was possessed in 1631; see the title to his *Treatise of the Passions*. He was not consecrated bishop till 1660, and none of Cecil's works bear date after the reign of Charles I.

He engraved a monument in Dugdale's Warwickshire, and some of the maps; the cuts in Norton's Ordinal, and finished those for Ashmole's Theatrum Chemicum in 1651, at the latter's house in Black-friars. Vertue says, from Ashmole's MSS. that during the Interregnum Vaughan engraved a print of Charles II. to which he added so offensive an inscription, that an accusation was preferred against him for it after the restoration. I have a very curious little book, intitled, "The true Effigies of our most Illustrious Sovereign Lord King Charles, Queen Mary, with the rest of the Royal Progenie; also a Compendium or Abstract of their most famous Genealogies and Pedigrees, expressed in prose and verse, with the times and places of their births, 1641." It contains heads

of the king, queen and prince Charles, and whole lengths of Mary, James, Elizabeth, Anne, Henry in his cradle, and an elder Charles who died. Some are by Hollar, one by our Robert Vaughan.\* The duke of York is playing at tennis.

Edward Terry, rector of Greenford, Middlesex. This is the latest I find of Vaughan's works, being dated 1655. There is a print of Robert Deyereux earl of Effex, general of the parliament, which Ames gives as engraved by J. Vaughan. If this is not an error of the press for R. it might be a brother. There is another of this lord by J. Hulett, † of whom I find no other work, ‡ except a print of Sir T. Fairfax.

## WILLIAM MARSHAL,\*

1634 } A more voluminous workman, who  
by the persons he represented I should conclude practised early in the reign of James. In the year 1634 and six or seven years afterwards he was employed by Moseley the bookseller to grave heads for books of poetry, and from † their great familiarity in drawing and ornament, Vertue supposed that he drew from the life, though

tionary of Arts and Sciences, ~~and from the Life of Queen Anne~~, both published in weekly numbers, by Robert Walker. The plates for the latter were copied from Dubosc.

\* He might be brother of Alexander Marshal the painter, whom I have mentioned in a former volume. Another William Marshal was a printseller in the year 1690.

† He instances in the prints of Stapleton, Milton and Hodges. The last I find nowhere else.

he has not expressed *ad vivum*, as was the custom afterwards; and he was confirmed in this conjecture by a print of Milton at the age of 21, with which *Milton*, who was handsome, and *Marshall* but a coarse engraver, seems to have been discontented by some Greek lines, that are added to the bottom of the plate, which was prefixed to his *Juvenile Poems*. *Vertue* adds, that from this to the year 1670 he knows no engraving of *Milton*, when *Faithorne* executed one, with *ad vivum delineavit et sculpsit*, and this *Vertue* held for the most authentic likeness of that great poet, and thought *Marshall's* and *Faithorne's* bore as much resemblance as could be expected between features of 21 and 62. *Marshall* had the felicity too of engraving *Shakespeare* for an edition of his poems in duodecimo 1640, representing him with a square stiff band and a laurel in his hand. This is very hard, but not so bad as three others I have by his hand, of bishop *Ridley*, of Doctor *Whitacre*, and of Robert *Dudley* earl of *Leicester*. There is besides

a larger oval of Dr. T. Taylor. But the best of his works that I have seen, and that too probably one of his earliest, before employed in the drudgery of booksellers, is the head of a young author, without \* a name, æt. 18, anno 1591, but with arms, a Spanish motto, and some verses by Isaak Walton. This is much laboured. Ames has recorded about twenty more, of lord Bacon, lord Burleigh, Charles I. doctor Colet, R. Carpenter, earl of Essex, queen Elizabeth, John Hall, marquis of Hamilton, Philemon † Holland, Robert Jenkins, Henry earl of Monmouth, John Sym, R. Sibbes, J. tributed to their illustration, deserves a larger article in such a work than I am able to give of him.\* Sanderfon, an intelligent writer on the same topics, is equally unknown to us; his *Graphice*, though in tortured phrase, contains both sense and instruction. The writers of that age, though now neglected for their uncouth style, their witticisms, and want of shining abilities, are worth being consulted for many anecdotes and pictures of manners, which are to be found no where else. What variety of circumstances are preserved by Loyd, Winstanley, and such obsolete biographers! Fuller, amidst his antiquated wit, yet wit it was, is full of curious, though perhaps minute information. Fug.

\* He was of Trinity College, Cambridge, where he took the degree of Master of Arts, and was tutor to the earl of Arundel's children, whom he attended into the Low Countries. Besides the *Compleat Gentleman*, he wrote a little tract with some humour, called the *Worth of a Penny*; and divers other works, as is said, in an advertisement at the end of the second edition of the last mentioned piece.

successor, Anthony Wood, who had no more notion of elegance than a scalping Indian, nor half so much dexterity in hacking his enemies, is inexhaustibly useful. Peacham finds his place here by a good print that he engraved after Holbein of Sir Thomas Cromwell, knight, afterwards earl of Essex.

## ROBERT DE VOERST

1635 } Was an eminent master, competitor of Vosterman, and known by some prints of merit from the works of Vandyck. In what year he came to England, & left it, does not appear: his latest works in this country are dated 1635. Vanderdort, who mentions him three or four times in king Charles's catalogue, \* expressly calls him the king's engraver, for whom he did two plates, one of his majesty's sister, the other of the emperor Otho, which Vandyck painted to supply the

He executed another of the queen alone, and the following;

Robert earl of Lindſey, from Mirævelt.

James Stewart duke of Lenox, a middleſized oval, with ſhort round head of hair. Geo. Geldorp pinx. Another, when younger

Philip Herbert, earl of Montgomery (afterwards of Pembroke) larger oval. Mitens pinx. Another ſquare, after Vandyck, very freely done.

George Clifford earl of Cumberland, with a truncheon.

He also, as I have said, cut some plates of animals for Crispin Pass's drawing-book: but his works, says Vertue, are not numerous. His head is in the collection of Vandyck's painters.

## LUKE VOSTERMAN

Was, I think, superior to his rival Voerst, at least his prints are more highly finished. Vertue says, he staid here about five or six years, but in different places has mentioned works that take in the space of eight years. He was employed by the king and the earl of Arundel,\* and his and Voerst's plates seem to be the first that were done here from historic subjects. Vosterman, from the king's collection, engraved Raphael's St. George, Christ praying in the garden by Annibal Caracci, and his burial by Parmegiano, and Lot and his daughters by the

same. For the earl of Arundel, as early as 1623, he made some drawings with the pen, particularly a woman's head from Lionardo da Vinci, and a portrait of prince Henry. And for the same lord he performed a good print from Vandyck's fine picture of the earl \* and his countess Alatheia Talbot, sitting together, the earl pointing to a globe. To the same lady Vofterman dedicated a large print on six sheets, from Rubens's battle of the Amazons. And he drew the old countess Anne Dacre, the earl's mother, from whence Hollar engraved a very neat and rare print. What portraits I find of his hand are,

Charles I. with ruff, ribband, and flashed habit; large octavo, good.

Vandyck looking over his shoulder, and holding up his cloak, chain about his neck.

Thomas duke of Norfolk, with the staves of lord treasurer and earl marshal, from Holbein. A very fine print.

other pictures of Sir Thomas. This has a flatter face, and a very small bonnet. His right hand is held up to his beard, a letter or paper in his left, a little white dog lies on a table before him.

Erasmus, after the same painter.

'Holbein himself, with the pencil in his left hand, I suppose copied from another print.

Aloysius Contarini, ambassador from Venice to James I: 1628.

The old, old, very old man, Thomas Parr.

Claudius Maugis, 1630.

William earl of Pembroke.

William Cav<sup>d</sup>ndish, marquis of Newcastle.

Abraham Aurelius, Lond. æt. 43, 1618.

Charles duke of Bourbon.

St. George, 1627.

St. Helena.

What heads he engraved from Vandyck, I suppose were executed after he left England. In that period too probably was done a small oval head of Jean Conté de Tilly, with

with four emblematic figures and six French verses. As I do not know the time of Vosterman's death, a print of Sir Hugh Cartwright, from Diepenbeck, engraved in 1656, might be the work of Vosterman junior, who made a plate from Holbein's Triumph of Riches. The father, while in England, painted a small piece or two for a Mr. Skinner of Rochester.

In this place should appear the indefatigable and admired Hollar, but the very enumeration of his works having furnished his no less laborious successor Mr. Vertue, with matter for an entire volume, it would be impertinent to dwell on his article. Though employed by bookellers, few of his prints but were useful or curious. His largest are indifferent; the nearer his works approach to wanting a magnifying glass, the nearer they advance to perfection.

About the same period were many other artists, several of whom at present support their claim by a single print or two. I will name them, because when once ranged, it is easy for collectors to allot to them as

*VOL. V.* *F* *many*

many more of their works as shall be discovered; and I hope the former will thank me for my pains; for if the drudgery of collecting is dull, what is it to be a collector's collector? &c.

## MARTIN DROESHOUT,

His heads are Shakspere; John Fox, martyrologist; Richard Elton; John Howson, bishop of Durham: to this print is the name of William Peake, printseller, probably the father of Sir Robert Peake, who engraved some things himself, and whom I have mentioned in my second volume. Droeshout was also employed for Haywood's Hierarchy of Angels, and executed a print of Dido stabbing herself for Staphylton's Virgil, octavo, and a head of lord Mountjoy Blount.

from the Arundelian collection. At Paris  
was a collection of plates from that cabinet,  
containing 567 pieces packed into a book.  
Vanderborcht's are dated from 1631 to  
1638.

T. S L A T E R

Lived, I suppose, about this time, having  
graved a head of George Webbe, bishop of  
Limerick, whose dress is of that age. See  
Ames, p. 180.

Some English heads were done by an engraver that I do not find was ever here, though he styled himself the king's engraver: They are very large and handsome prints, particularly those of Charles I. his queen, and the duke of Buckingham. There is a smaller of Sir Dudley Carleton, and one still less of Antonio di Dominis, archbishop of Spalatro. This artist was William Delff, who worked chiefly after Mirevelt.

George Gifford did a head of John Bate, poor enough; and another of Hugh Latimer, bishop of Worcester, Edmund Marston, and a head of George Tooke of Popes, oval.

F. H. VAN HOUTE

Another Dutch engraver, and more † prolific, seems to have worked here from the end of Charles I. to near the conclusion of the reign of king William: his cuts are dated in the years 1648, 1653, 1654, 1692, &c. ‡ but I have seen nothing of his hand

though having given what particulars Vertue could discover relative to his life, I shall here only specify his etchings.

of Hollar, and though I do not know that he attempted views, may in his heads be mistaken for that master. Indeed that is not saying that he arrived at great excellence; yet he far out-shone many I have mentioned. He engraved the couchant Venus of Titian with a Spaniard playing on an organ, a fine picture of king Charles's collection and since of lord Cholmondeley's. The other works of Gaywood are portraits, of Mary queen of Scots with a cross in her hand; W. Drummond of Hawthornden the Scottish historian, a small oval, with his arms; Edward Cocker, who seems to have been an \* engraver too; there are two different prints of this man, one of them very neat. MR. FRANCIS PLACE,

A gentleman of Yorkshire, had a turn to most of the beautiful arts. He painted, \* designed and etched; Vertue had heard that he learned the latter of Hollar, and has preserved a letter that he received from Mr. Place, in answer to his inquiries into that fact and about Hollar himself, of whom he relates on his own knowledge many particulars which Vertue has inserted in his life of that artist, but denies his having been instructed by him. Mr. Place was a younger son of Mr. Rowland Place of Dinsdale in the county of Durham, and was placed as clerk to an attorney in London, where he continued till 1665, in which year going into a shop, the officers came to shut up the house, on its having the plague in it. This occasioned his leaving London; and gave him an opportunity of quitting a profession

that was contrary to his inclination, and of following the roving life he loved, and the arts for which he had talents. \* Ralph Thoresby, in his *Ducatus Leodiensis*, † often mentions Mr. Place with great encomiums, and specifies various presents that he made to his Museum. He tells us too that Mr. Place discovered an earth for, and a method of making porcelaine, ‡ which he put in practice

† P p. 195, 456, 477, 492, 497. At the end of this account of Leeds is a catalogue of Thoresby's own Museum, now dispersed, in which were some valuable, and many foolish curiosities. Of the latter sort, was a knife taken from one of the Mohawks 1710, so seriously was that vision believed at that time by grave people. Another of his rarities was a leaf of an Ananas; that fruit, now so common here, was scarce enough in the year 1715 to have a leaf of it preserved in a repository. The book itself is very interesting. Thoresby, like other solemn and retired triflers, thought the world interested in knowing whatever related to them. Ashmole's Diary is ridiculously curious. Thoresby informs us that in his youth he was uneasy when he first observed that he had not the usual quantity of spittle that others have, p. 615. What a brave discovery was printing for his Ta who wished to record how often they sneezed!

‡ His pottery cost him much money: he attempted it solely from a turn to experiment; but one Clifton of Pontefract

practice at the manor-house of York, of which manufacture he gave Thoresby a fine mug. † From the same account we learn that Mr. Place discovered porphyry at Mount Sorby in Leicestershire, of which he had a piece to grind colours on. This author specifies views of Tinmouth-castle and light-house; the cathedral of York, churches and prospects of Leeds, drawn and etched; and a mezzotinto of Henry Gyles the glass painter, executed by Mr. Place. He also scraped three plates of John Moyser, esq. of Beverly, his particular friend; of Thomas Comber dean of Durham, and of bishop Crew; the last is finely executed. Many sketches of castles and views which he took in Wales, and of various other places in England, Scotland, and Ireland, several of them well finished, are extant, and have been engraved. A view of Scarborough-castle was drawn as late as the year 1715. His prints are very scarce; he sel-

dom resided in London, and drew only for his amusement, seldom compleating what he undertook, and in his rambles painting, drawing, and engraving, occasionally. In the reign of Charles II. he was offered a pension of £. 500 a year to draw the royal navy; but declined accepting it, as he could not endure confinement or dependence. In Thoresby's Topography of Leeds are some churches drawn by Place. Anon mentions a print by him, which I have, of Richard Thompson, from a painting of Zouft: It is boldly done. Another is of Sterne, archbishop of York. He also did some plates of birds, v. vol. iii. of Anecdotes of Painting, article, Griffiere; and the figures for Godartius's book of insects. Mr. Place died in 1728, and his widow, by whom he had a daughter married to Wadham Wyndham, esq. quitting the manor-house in York, disposed of his paintings, among which were an admired piece of fowls, others of flowers and fish, unfinished. There are two heads of Mr. Place extant, one by himself, the face only finished, and another by Murden.

of that town [then \* newly made a corporation by Charles I.] where our artist was born July 4, 1649, and inherited an estate of ~~3000~~ a year. From school he was sent to Jesus College, Cambridge, and thence to Lincoln's-inn; but more pleasurable studies suiting his genius, he attended Thomas lord Bellasis, afterwards viscount Falconberg, in his embassy to Venice, where meeting with Giacomo Barri's *Viaggio Pittoresco*, wherein are particularized the chief pictures in Italy, and an account of Canon Settala's famous cabinet at Milan; Mr. Lodge translated it into English, and added of his own ~~graving~~ heads of the most eminent painters, and a map of Italy; printed in octavo, 1679. While on his travels he drew various views, which he afterwards etched. Returned to England he assisted Dr. Lister of York in ~~drawing~~ rare shells and fossils, which the doctor transmitted to the Royal Society, and are inserted in their Transactions, particularly the Table of Snails,

No. 85; the Trochitæ and Entrochi, No. 100; the Alveolites, No. 111; the drawings of which were in Thoresby's Museum, from whom Vertue received these memoirs. He also drew for Dr. Lister thirty-four different sorts of spiders. There was then at York a club of Virtuosi, composed of Dr. Martin Lister, John Lambert, esq. Thomas Kirke, esq. Mr. Lodge, and Mr. Francis Place. Between the two last congenial artists was a strict friendship. Once on their rambles, on which they often staid three or four months, as they were taking views in Wales, they were suspected for Jesuits [it was at the time of the Popish plot] seized, imprisoned, and not released but on the appearance of some friends from Chester. Thoresby, who amidst his puerile or anile ideas, could not avoid the superstition of ~~monks~~ <sup>monks</sup>, related to my author, that Lodge being on a fishing party at Mr. Boulter's, at Stank near Harwood, dreamed [it seems he had never dreamed before, and Thoresby quotes Mr. Locke \* for another

monon[ist] that he should be buried in Harwood church. This vexed him, as he had desired his sepulture at Gisburn, near Craven, by his mother. A dream is nothing without the completion! Lodge died at Leeds; but as the horse passed by Harwood, the carriage broke, the coffin was damaged, and the dream happily fulfilled, the corpse being interred in the choir there Aug. 27, 1689. "One captain Fisher wrote upon Mr. Lodge's picture, "*Parisiis, Burdegala, Romæ, ac postremo Venetiis humanioribus studiis juxta biennium versatus, jam tandem honestis litteris et artibus excultus, natale solum petiit 1671, ætatis 23, jam pridem hospitii Lincolnien[si]s admisso socio.*"

## WILLIAM SHERWIN,

1670 } Son of a divine of the same names,  
} is the only person whom I find to have been royal engraver by patent, which himself, on a print of his father, prefixed to the latter's clavis, tells \* us he was. By what interest he obtained this distinction, does not appear; certainly by no great excellence in his profession. Nor are his works numerous, though he exercised his art for many years. Ames mentions about sixteen heads by him; and there is another,

\* V. Ames, p. 157.

which he has omitted, of John Gadbury, the almanac-maker, who has been represented by no less than four artists. Sherwin perhaps engraved other plates, besides portraits. He has done two of Charles II. one, whole length, prefixed to Ashmole's Order of the Garter. The first works I find by him are, William Bridge and William Salmon, both in 1670; ~~the latest~~, judge Powell, in 1711. The regular Architect of the general Rule of the five Orders, by Vignola, with additions by Michael Angelo, done into English by J<sup>r</sup> Leake, was printed for W. Sherwin, engraver, 1669.

## JOSEPH NUTTING

Probably commenced engraver about the time of the Restoration, as not long after he did a plate of Mary duchess of Beaufort, from a picture of Walker, and therefore it is likely that he was of some eminence. A head of Matthew Mead, father of Dr. Mead the physician, is the best thing I have seen  
of

of him; his works are few, as Sir John Choke, from an old picture; James Bonnel, M<sup>r</sup>. Locke, George Parker, almanac-maker; and three of the family of Rawlinson; the last dated 1709. He also engraved a frontispiece to Greenhill's Art of Embalming, and a head of the author from a picture by Murray.

We now come to one of the most capital engravers that has appeared in this country. The number of those, whose works deserve intrinsic regard, abstracted from their scarcity, or the curiosity of the persons and objects represented, is very small, and soon enumerated. The family of Pais were singularly neat: Hollar still surpassed them, and in branches to which their art never extended. Voist and Vosterman shone in a higher style. Lombart added roundness to delicacy, and was even a great performer, if compared with most of his successors, of whom Robert White seems to have declined the least. John Smith carried the new discovered art of mezzotinto to the greatest perfection we have seen it attain. The last  
John.

John Faber in some things was, though far inferior, a good workman. Kirkall, commonly a wretched labourer, had singular merit in one branch that will be mentioned. Mr. Strange, ashamed of the creeping and venal style to which the art was sunk in Britain, has given us the works of Italian masters, with a tool worthy of Italian engravers. But yet there had been one Englishman, who without the timid perfection of French masters, had shown that softness and force, freedom and finishing, were compatible, and that the effect of *chiaro scuro* did not depend upon unblended masses of white and black; this was

ter and printseller, afterwards knighted, with whom he worked for three or four years before the eruption of the civil war, and whom he accompanied into the king's service. Being made prisoner at Basing-house, Faithorne was brought to London, and confined in Aldersgate, where he reverted to his profession, and among other heads did a small one of the first Villiers duke of Buckingham, in the manner of Mellan. After much solicitation by his friends, he was permitted to \* retire to France, where he found protection and encouragement from the Abbè de Marolles, a singular man, who, with slender competence of parts, drummed and trumpeted for learning and the arts, till he was admitted into the profession. His memoirs are their memoirs,

'Graham says he was banished for refusing to take oaths to Oliver, but by the account of his two friends whom I transcribe, he returned to England before the protectorate, which agrees better with a head I shall mention presently, and with a shepherdes which he did at Paris in 1649. Graham adds, that he studied several years under Champagne, which is also doubtful,

By her he had two sons and a daughter, Henry bred a bookseller, William to his father's profession. Faithorne now set up in a new shop, at the sign of the ship next to the drake, opposite to the Palsgrave's head-tavern without Temple-bar, where he not only followed his art, but sold Italian, Dutch and ‡ English prints, and worked for bookfellers, particularly Mr. Royston, the king's bookfeller, Mr. Martin his brother-in-law in St. Paul's church-yard, and Mr. William Peake, a stationer and printfeller on Snow-hill, the younger brother of his old master. Some time after the year 1680

Faithorne

Faithorne quitted his shop, and retired to a more private life in Printing-house-yard, Blackfriars, still engraving, but chiefly painting from the life in crayons, in which branch he had formerly received instructions at Paris from Nanteuil. To these portraits I suppose we must refer such of his prints as have W. Faithorne pinxit; though he also drew in \* black and white, as John Aubrey in the Museum at Oxford. His crayon heads, mentioned by his biographers, were Mr. Lepipe, the painter, col. J. Ayres, Mr. Allen, Mr. Smith, † Mr. Sturt, and Mr. Seddon, and most of the noted writing-masters. The last he undertook was of Mr. Jo. Oliver, surveyor of the works at St. Paul's. The misfortunes of his son William broke ‡ his spirits, though he was a

robust and vigorous man ; a lingering consumption put an end to his life. He was buried near his wife, in St. Anne's Blackfriars, May 13, 1691. Besides his pictures and plates, he published his *Art of Graving* \* in 1652, dedicating it to his master Sir Robert Peake. His friend Flatman † consecrated a poem to his memory, concluding,

His own head, looking over his shoulder,  
Long Hair.

Sir William Paston, baronet, 1659. A plump gentleman, very long hair, silk mantle over one shoulder. Every part of this print, which I think the best of his works, is finished in the highest perfection.

Lady Paston, same year; probably after a picture of Vandyck.

Margaret Smith, widow of Thomas Smith, and wife of Sir Edward Herbert; from Vandyck. A whole length of her by the same master was in the Wharton collection, afterwards in my father's, and now mine.

Montagu Bertie second earl of Lindsey, from Vandyck.

William Sanderfon, ætat. suæ 68, 1658. Soult pinxit. This head is prefixed to his *Graphice*, and does honour both to painter

and engraver. There are two of these heads somewhat different.

Carew Reynell, armiger. Young man; long hair, short band tied.

Samuel Collins, doctor of physic, æt. 67.  
W. Faithorne ad vivum delin. et sculp.

Anne Bridges countess of Exeter, from Vandyck.

John Kersey, born at Bodicot, &c. 1616 : mathematical books. Soust pinx. 1672.

John La Motte, esq. citizen of London.  
Born 1577, deceased 1655.

John viscount Mordaunt. Head in armour, oval frame surrounded with arms, in the manner of prints of the Scottish nobility. Titles in Italian.

Thomas earl of Elgin, æt. 62, 1662. Old man with long hair, holding his mantle with his right hand.

Mary daughter of Sir Edward Alston, wife of Sir James Langham.

Henry Cary earl of Monmouth.

John Pordage, philosopher, physician, divine.

Thomas Killigrew, in a fur cap, sitting  
at

at a table on which lie several of his works. Head of Charles I. hung up, a dog by the table. W. Sheppard pinx.

George Rodolphus Weckkerlin, æt. 50. Mytins pinx.

Thomas Stanley, octagon frame. P. Lilly pinx.

Robert Bayfield, æt. 25, 1654, in a large hat, four English verses.

Another of the same person without a hat, æt. 27.

Francis Rous, provost of Eton, large hat, æt. 77, 1656, four English verses.

Small head of a man with long hair and little band, in an oval, with six verses, inscribed J. S. Wright, which shew the person represented to have been an author.

Another small head of a man looking off, long hair curled, four English verses, inscribed, G. W. It is the portrait of Noah Bridges, clerk of the parliament.

Sir Henry Spelman, ruff and point night-cap.

Thomas Hobbes, æt. 76. *En quam modice habitat philosophia.*

One Loveday, in an octagon frame, with six English verses, devices, and French mottoes.

A young clergyman, ditto, no name. Arms, five crescents on a cross; æt. 28, 1662.

Samuel Leigh, young man's head. Arms, æt. suæ 15, 1661. Incipe & perforce, Domine.

Henrietta Maria, with a veil. Royal arms, Scotland in the first quarter. Done at Paris in the manner of Mellan.

A fine head of Smith, writing-master, drawn by Faithorne, but engraved by Vanderbank.

Thomas Mace, prefixed to his book of Music: Faithorne subscribed for three copies.

Henry More, sitting under a tree in a landscape, half-length.

Sir Orlando Bridgman, with the purse, half-length.

\* Ames, p. 62, mentions a fine head by Faithorne of Edward Ellis of Baliol College, to which this print and arms answer.

Robert Boyle, in an oval, with an air-pump.

Elias Ashmole, bust in a niche. He paid the seven pounds for the plate.

William Oughtred, æt. 83, in the manner of Hollar, and as good.

John Wallis, S. T. D. prefixed to his *Mechanica*.

Head of a young man, in his own hair, cravat tied with a ribband before; mantle. Arms, a lion rampant crowned, within a bordure. Half sheet.

A large emblematic sheet print of Oliver Cromwell, whole length, in armour, with variety of devices and mottoes. This very scarce print is in my possession: I never saw another proof of it.

Sir Francis Englefield, knt. and bart. of Wotton Bassett, in the county of Wilts. Oval, armour, flowing hair; half sheet; exceedingly scarce.

Henry Somerset marquis of Worcester, in the print, with a truncheon.\* I have a proof of this, on which the titles are finely written by Faithorne himself, otherwise the plate had no inscription.

\* This print has the garter, though it was never given to the marquis. Probably it was promised; and the plate wanting the titles, looks as if lord Somerset died before it was finished, and before the promise could be completed through the misfortunes of both the king and the marquis. I once took this for a print of his son Edward, and so did Vertue; but it is evidently copied from an older print done when Henry was only earl, and which has his name, and was sold by Stent. In that print there is much less appearance of a ribband; so small a bit, that it might not be intended for the garter, and Faithorne by mistake might supply the rest and the George as he has done.

— Barbara countess of Castlemaine, half-length, leaning on her left hand, in an oval frame.

Christopher Simpson (a master of music) J. Carwarden pinx. a name I have seen nowhere else. There is a smaller print of the same person, but much inferior.

Prince Rupert, dishevelled hair, ribband with a large knot round his neck, broad sash laced, a remarkable print, G. Dobson pinx.

Small head of some author, in a Roman habit; six English lines.

Charles I. small head in an oval frame, with cornucopiæ and stone-work; seems a head-piece to some book.

John Bulwer, long Latin inscription.

Edward Boys, S. T. B. æt. 66.

Mrs. Sarah Gilly, small head in oval. This plate is sometimes inscribed, Hannah Wooley, but the best impressions have the name of Gilly.

A woman whole length, small, in short vest, long petticoat, a cloak with loops hanging behind. Under the figure, *Mariqua*, 1655.

Mrs. Katherine Philips, a bust; on the pedestal, *Orinda*.

Mr. Abraham Cowley. W. Faithorne sculp. 1687. Another smaller, en buste; a third to his Latin Poems.

Richard Carpenter, in the same frame a profile, out of the mouth of which proceeds an animal's head breathing fire. Four Latin lines.

Francis Gliffon, doctor of physic, æt. 75.

William Gouge, æt. 79, 1653.

Valentine Greatrakes, the stroker; stroking a boy's head. See an account of him in *St. Evremont*.

John Mayow, in the habit of a doctor of physic.

Sir Richard Fanshaw. Died at Madrid 1666.

Bust of Lucian in a niche, Greek motto, ten English verses.

Dr. Harvey, bust on a pedestal.

Charles

Charles II. round the frame, Honi soit qui mal y pense.

Two others larger, one in armour, with six English verses; the other in robes of the garter, the royal arms disposed at the four corners.

Sir Thomas Fairfax. Rob. Walker pinx. in the manner of Mellan:

John Milton, æt. 62, 1670. Guil. Faithorne ad vivum delin. et sculpsit.

Francis More, serjeant-at-law.

John Hacker, bishop of Ely and Coventry. Four English verses.

Cardinal Richelieu, prefixed to the English translation of his life, by John Doddington.

Monsieur de Thevenot, whole length, in an Asiatic habit.

Henry Terne, with an account of him in Latin. W. Sheppard pinx.

Lord chief-justice Anderson, æt. 76.

Sir Henry Coker, æt. 48, 1669. Account of him in English.

| Sir Bulstrode Whitelocke in armour.\*

| Charles earl of Carlisle in armour, octagon frame.

1660 } Vertue had been able to trace  
no circumstances of his life, but  
that he came from Paris, and returned  
thither, the first certainly before the Revolution, as he graved a plate of the protector;  
a frontif-

a frontispiece to Ogilby's *Virgil*, published in 1654; a title to a small octavo in 1658; and Sir Robert Stapleton's head for his *Juvenal* before 1660. In fact, he does not seem to have staid long here in the reign of Charles II. a cut of Antoine \* Grammont being dated at Paris in 1663. In 1660 he made a large title-plate with many figures for Field's bible, printed at Cambridge. His best works are the twelve half-lengths from Vandyck, too well known to be particularized. His other plates I will repeat briefly, as I shall those of subsequent engravers. As they grow nearer to our own times and are common, to describe them is unnecessary.

\* So Vertue. I suppose this was Antony first duke of Grammont. Of his brother Philibert, the famous Count Grammont, I have given a print to his *Memoires* from his portrait among the knights of the St. Esprit in the *Sale des grands Augustins*, at Paris—a collection it is surprizing the French have never engraved, as it contains so many of their great men. Every new knight sends his portrait to that repository. It is pity the same practice is not observed by our knights of the garter.

In Overton's catalogue of prints dated 1672, is mentioned a book of the Seven Sciences, eight plates by Lombart, but probably executed when he was in England.

Vertue also names an emblematic print which he calls Theophila, or Love-sacrifice, with the device of the Trinity. It is the title to Bendlowe's Divine Poems, folio 1652. .

P R I N C E R U P E R T.

It is a trite observation, that gunpowder  
was discovered by a monk, and printing by  
a soldier. It is an additional honour to the

latter profession to have invented mezzotinto. - Few royal names appear at the head of discoveries, nor is it surprising. Though accident is the most common mother of invention, yet genius being a necessary midwife to aid the casual production, and usher it to existence, one cannot expect that many of the least common rank should be blest with uncommon talents. Quickness to seize, and sagacity to apply are requisite to fortuitous discoveries. Gunpowder or printing might have fallen in many a prince's way, and the world have been still happy or unhappy though not to possess those arts. Born with the taste of an uncle, whose sword was not fortunate in defending, prince Rupert was fond of those sciences which soften and adorn a hero's private hours, and knew how to mix them with his minutes of amusement, without dedicating his life to their pursuit, like us, who wanting capacity for momentous views, make serious study of what is only the transitory occupation of a genius. Had the court of the first Charles been peacefull, how agreeably,

agreeably had the prince's congenial propensity flattered and confirmed the inclination of his uncle! How the muse of arts would have repaid the patronage of the monarch, when for his first artist she would have presented him with his nephew! How different a figure did the same prince make in a reign of dissimilar complexion! The philosophic warrior, who could relax himself into the ornament of a refined court, was thought a savage mechanic, when courtiers were only voluptuous wits. Let me transcribe a picture of prince Rupert, drawn by a \* man who was far from having the least portion of wit in that age, who was superior to its indelicacy, and who yet was so overborn by its prejudices, that he had the complaisance to ridicule virtue, merit, talents.—  
•But prince Rupert, alas! was an awkward lover!

“ Il étoit brave & vaillant jusqu' à la temerité. Son esprit étoit sujet à quelques travers, dont il eut été bien fâché de se cor-

\* Count Hamilton.

riger. Il avoit le genie fecond en experiences de mathematiques, & quelques talens pour la chimie. Poli jufqu' à l'exces, quand l'occasion ne le demandoit pas, fier, & meme brutal, quand il etoit queftion de s'humanifer. Il etoit grand, & n'avoit que trop mauvais air. Son vifage etoit fec & dur, lors meme qu'il vouloit le rajeunir ; mais dans fes mauvaises humeurs, c'etoit une vraie phifionomie de reproche."

What pity that we who wish to transmit this prince's resemblance to posterity on a fairer canvas, have none of their imitable colours to efface the harsher likeness! We can but oppose facts to wit, ~~with~~ to satire: How unequal the pencils! Yet what these lines cannot do, they may suggest: They may induce the reader to reflect, that if the prince was defective in the transient varnish of a court, he at least was adorned by the arts with that polish, which alone can make a court attract the attention of subsequent ages.

We must take up the prince in his laboratory, begrimed, uncombed, perhaps in a dirty shirt; /

shirt; on the day I am going to mention he certainly had not shaved and powdered to charm Miss Hughes, for it happened in his retirement at Brussels, after the catastrophe of his uncle. \* Going out early one morning, he observed the centinel at some distance from his post, very busy doing something to his piece. The prince asked what he was about? He replied, the dew had fallen in the night, had made his fusil rusty, and that he was scraping and cleaning it. The prince looking at it was struck with something like a figure eaten into the barril, with innumerable little holes closed toge-

\* This account Vertue received from Mr. Killigiew of Somerset-house, who had it from Evelyn. In the General Dictionary a MS. said to be drawn up by Mr. Evelyn himself, ascribes the invention to the soldier. Yet in Mr. Evelyn's printed account of the discovery he expressly calls it, Invented by the prince. It is possible that the soldier might have observed the effect of scraping the rust from his piece, and yet have little thought of applying it, which probably was his highness's idea. In the Parentalia the invention is ascribed to Sir Christopher Wren, who is there said to have communicated the discovery to the prince, p. 214.

ther;

ther, like friezed work on gold or silver, part of which the fellow had scraped away.

One knows what a meer good officer would have said on such an accident; if a fashionable officer, he might have damned the poor fellow, and given him a shilling; but the *Genie second en experiences* from so trifling an accident conceived mezzotinto. The prince concluded that some contrivance might be found to cover a brass plate with such a grained ground of fine pressed holes, which would undoubtedly give an impression all black, and that by scraping away proper parts, the smooth superficies would leave the rest of the paper white. Communicating his idea to Wallerant Vaillant, a painter whom he maintained, they made several experiments, and at last invented a steel roller, cut with tools to make teeth like a file or rasp, with projecting points, which effectually produced the black grounds; those being scraped away and diminished at pleasure, left the gradations of light.

The surprize occasioned by the novelty of the invention, by its softness, and union of parts, cannot better be expressed than in the words of Mr. Evelyn, whose abilities deserved the compliment paid to him by the prince of being one of the first to whom this secret or mystery, as they held it, was imparted, and who was so dazzled with the honour of the confidence, or with the curiosity of the new art, that after encouraging the world to expect the communication, he checked his bounty, and determined not to prostitute the arcanum, but to disclose it only to the elect. —Here \* is his oracular description;

“ It would appear a paradox to discourse to you of a graving without a graver, burin, point or aqua fortis; and yet this is performed without the assistance of either: That what gives our most perite and dextrous artists the greatest trouble, and is longest finishing [for such are the hatches and deepest shadows in plates] should be here the least considerable, and the most expedi-

\* *Sculptura*, p. 146.

tious; that, on the contrary, the lights should in this be the most laborious, and yet performed with the greatest facility: That what appears to be effected with so little curiosity, should yet so accurately resemble what is generally esteemed the very greatest; ~~that~~ that a print should emulate ~~even the~~ best of drawings, chiaro e scuro, or [as the Italians term it] pieces of the mezzotinto, so as nothing either of Hugo da Carpi, or any of those other masters, ~~who~~ pursued his attempts, and whose ~~works~~ <sup>drawings</sup> we have ~~already~~ celebrated, have exceeded, or indeed approached; especially, for that of portraits, figures, tender landscapes, and history, &c. to which it seems most appropriate and applicable."

Thus, as he owns, he leaves it enigmatical; yet thinks he has said enough to give a hint to ingenious persons how it is performed.—In truth, they must have been more ingenious even than the inventor himself to have discovered any thing from such an indefinite riddle. One knows that ancient sages used to wrap up their doctrines, discoveries, or nonsense, in such unintelligible jargon;

gon ; and the baby world, who preferred being imposed upon to being taught, thought themselves extremely obliged for being told any secret which they could not comprehend. They would be reckoned mountebanks in this age, who should pretend to instruct, without informing ; and one cannot help wondering that so beneficent a nature as Mr. Eveyn's should juggle with mankind, when the inventor himself had consented that the new art should be made public.\*

Indeed, curious as the discovery was, it did not produce all it seemed to promise ; it has diversified prints, rather than improved them ; and though Smith, who carried the art to it's greatest height yet known, had considerable merit, mezzotintos still fall short of fine engravings. But before the secret passed into his hands, it was improved by Blooteling, who found out the application of the chisel for laying grounds, which much exceeded the roller. George White afterwards made use of the graver for form-

\* See Mr. Evelyn's own excuse for not telling his secret of mezzotinto, in his *Sculptura*, p. 148.

ing the black spot in eyes, and sharpening the light, which in preceding mezzotintos he observed had never been sufficiently distinct.

Some have thought that the prince only improved on Rembrandt's manner in his prints, but there is no account of the latter making use of a method at all like that practised for mezzotintos.

Prefixed to Evelyn's account is a kind of Saracen's head performed by that prince, with his highness's mark thus, . There is another of the same in large; a man with a spear; and a woman's head looking down in an oval, no name to it. These are all his works in mezzotinto. Landscapes I think I have seen some etched by him; and in Jervase's sale were some small figures drawn loosely with the pen on white paper; under them was written, *Deffinati per il principe Roberto à Londra 23 Settembre*. The earliest date of a mezzotinto that Virtue had seen was an oval head of Leopold William archduke of Austria, with this inscription, *Theodorus Casparus à Furstenburgh, canonicus,*

nicus, ad vivum pinxit & fecit 1656. This person had undoubtedly received the secret before his highness returned to England.

## WALLERANT VAILLANT,

Though a painter of some reputation, belongs to this work in the light only of engraver. He was born at Lisle in 1623, but studied under Erasmus Quellin at Antwerp, on leaving whose school he applied himself to portrait-painting; and being advised to go to Franckfort against the coronation of the emperor Leopold, drew his picture with such success, that Vaillant soon found himself overwhelmed with business, till the Marechal de Grammont carried him to Paris, where in four years he found business enough to enrich him. He returned to Amsterdam and died there in 1677. At what period of his life he came to England does not appear, yet here he certainly was, and came with prince Rupert, who taught him the secret of mezzotinto. Descamps  
says

says that this mystery, as it was then held, was stolen from Vaillant by the son of an old man who scraped the grounds of his plates for him. This might be one of the means of divulging the new art; yet, as I shew in the life of Becket, he and Luttrell both learned the secret by other means. Vaillant also drew from the life in black and white. There is a mezzotinto, as I am informed, by him, of queen Henrietta Maria, sitting in a fringed chair, with a little girl resting against her knees, and a young man leaning on the back of the chair; he has a ribband cross his shoulder, the edges of which are a little fringed: The lady is at work. I have never seen this print, but it corresponds so much with part of the picture of Sir Balthazar Gerbier's family by Vandyck, mentioned in the second volume of these Anecdotes, that I suspect the lady is not the queen, but Gerbier's wife.

## Mr. JOHN EVELYN.

If Mr. Evelyn had not been an artist himself, as I think I can prove, I should yet have found it difficult to deny myself the pleasure of allotting him a place among the arts he loved, promoted, patronized; and it would be but justice to inscribe his name with due panegyric in these records, as I have once or twice taken the liberty to criticize him: But they are trifling blemishes compared with his amiable virtues and beneficence; and it may be remarked that the worst I have said of him is, that he knew more than he always communicated. It is no unwelcome satire, to say that a man's intelligence and philosophy is inexhaustible. I mean not to write his life, which may be found detailed in the new edition of his *Sculptura*, in Collins's *Baronetage*, in the *General Dictionary*, and in the *New Biographical Dictionary*; but I must observe that his life, which was extended to 86 years, was a course of inquiry, study, curiosity, in-

Vol. V. K struction,

struction, and benevolence. The works of the Creator, and the mimic labours of the creature, were all objects of his pursuit. He unfolded the perfection of the one, and assisted the imperfections of the other. He adored from examination; was a courtier that flattered only by informing his prince, and by pointing out what was worthy for ~~him~~ to countenance, and was really the neighbour of the gospel, for there was no man that might not have been the better for him. Whoever peruses a list of his works, will subscribe to my assertion. He was one of the first promoters of the Royal Society, a patron of the ingenious and indigent, and peculiarly serviceable to the lettered world, for besides his writings and discoveries, he obtained the Arundelian marblés for the University of Oxford, and the Arundelian Library for the Royal Society: Nor is it the least part of his praise, that he who proposed to Mr. Boyle the erection of a philosophic college for retired and speculative persons, had the honesty to write in defence of active life against Sir George Mackenzie's Essay on Solitude.

*Solitude.\** He knew that retirement in his own hands was industry and benefit to mankind; but in those of others laziness and inutility.

Vertue discovered that long before the appearance of Mr. Evelyn, his family had been engaged in what then were curious arts. In an ancient MS. in the Office of Ordnance he found these entries,

A patent for making salt-petre granted to George Evelyn and others 1587.

Powder-makers; George Evelyn, esq. of Wootton in Surrey 1587. Mr. John Evelyn; Mr. Robert Evelyn; Mr. George Evelyn, till the beginning of 1637.

The lady of our Mr. Evelyn had correspondent talents; she designed the frontispiece to his Essay on the first book of Lucretius †

\* This was the more remarkable, as Evelyn lived in the shade of philosophy; Mackenzie was continually engaged in the bustle of business and fiercest violence of party.

† Hollar inscribed a head of Vandyck to Mr. Evelyn.

But to come to the point which peculiarly intitles Mr. Evelyn to a place in these sheets.

There are five small prints of his journey from Rome to Naples, which are generally \* supposed to be etched by one Hoare from Mr. Evelyn's drawings; but a very ingenious and inquisitive † gentleman has ~~convincing~~ me that they are performed by his own hand. I cannot give the reader better satisfaction than by transcribing part of a letter which that gentleman was so obliging as to send me, and his modesty I hope will forgive the liberty I take with him.

“ Copy of the title to Mr. John Evelyn's five prints for his journey from Rome to Naples;

The inscription is engraved on the superficies of a large broken stone table, sustained

\* So the author of his life says, transcribed in the Biogr. Dict. The General Dictionary indeed calls them Mr. Evelyn's own engravings, which the following account will make clear.

† Mr. Nathaniel Hillier,

by a little genius with wings, standing about the middle of the plate: On each side are views of the Roman antiquities, particularly on the left is seen the arch of Septimius Severus:

Thomæ Henshaw Anglo omnium ~~emiliarum~~ & præclarissimarum artium cultori & propugnatori maximo et συνοψαµενῷ αὐτῷ (non propter operis pretium, sed ut singulare amoris sui testimonium exhibeat) primas has ἀδονιµασίας aquâ forti excusas & insculptas

R. Hoare excu.

Jo. Evelynus delineator  
D. D. C. Q.

The above is an exact copy of the titular Dedication to Mr. Evelyn's five prints of his journey from Rome to Naples; and

it is imagined that upon the face of the inscription there is a manifest appearance of Mr. Evelyn's being not only the designer, but also the engraver, as well as the dedicator of the prints; notwithstanding the author of his life, prefixed to the new edition of his *Sculptura*, says that they were engraved from his sketches by Hoare, an artist of character at that time; for when we come to examine the prints, and find the title exactly conformable to the above copy, and that the five views themselves are all of them subscribed *J E f.* at the right hand corner, and no other notation at all concerning any designer, engraver, or publisher whatever (except the little R. Hoare excus. at the bottom of the title just as above described) one can hardly think otherwise than the author of Mr. Evelyn's life must have been misinformed, and never have seen or carefully considered the inscription on the title dedicatory, and the prints themselves. Besides I should be glad to be informed how the author of Mr. Evelyn's life came to know that Hoare

was an artist, or engraver at all, and more especially one of character at that time, since Mr. Evelyn himself has not inserted him among the eighteen English engravers whose praise he has celebrated, and whose names he has given us p. 91, of his *Sculptura*; and though he tells us in p. 92, that there were some other English artists, who had merited with their graver, ~~but~~ were ~~not~~ known to him by name; yet surely, of all others, the artist who had engraved his own designs, could not have been among that number, more especially if he had ~~been~~ an artist of character. Not to mention a particular circumstance attending my 'set of the prints in question, (which I have great reason to believe were one of the sets which Mr. Evelyn kept for himself) being superscribed with a pen and ink, *my journey from Rome to Naples*, and with a black lead pencil, *sculpsit Johannis Evelynus Parisiis 1649*. However it ought to be mentioned that the pen and ink, and the black lead, do not appear to be of the same hand writing."

The General Dictionary corroborates the great probability of Mr. Evelyn engraving these views, by quoting more etchings by him, a view of his own seat at Wooton, and another of Putney; and Thoresby in his Museum says expressly, p. 496, that the prints of the journey from Rome to Naples were done by Mr. Evelyn, who presented ~~them to him~~, with his own head by Nanteuil.

## ABRAHAM BLOOTELING

Came from Holland in 1672 or 73, when the French invaded it, but staid not long, nor graved much here, but did some plates and some mezzotintos that were admired. Vertue says he received 30 guineas for etching a portrait of the duke of Norfolk. At Amsterdam, after he had left England, he published Leonardo Augustino's Gems in 1685, and etched all the plates. Was Blooteling's servant, and then married his sister; came with him from Holland, and returned with him, though he sometimes worked for Loggan. Valck engraved one of the finest prints we have: It is the famous duchess of Mazarin, sitting in very loose attire, with one hand on an urn. ~~There~~ is a beautiful portrait of the same duchess in a turban, painted in Italy, at the duke of St. Alban's at Windsor. Vertue knew but three more of Valck's entire works; Robert lord Broke, done in 1678; John duke of Lauderdale, in robes of the garter, and an indifferent mezzotinto of Mrs. \* Davis after Lely.

\* There is another of her in small quarto after Cooper. Valck assisted Schenk in publishing the large Dutch Atlas in 2 vols. folio, 1683.

## PETER \* VANDERBANK

1674 } Was born at Paris, and came to  
 } England with Gascar, the painter,  
 about the year 1674. He married the sister  
 of Mr. Forester, a gentleman who had an  
 estate at Bradfield in Hertfordshire. Van-  
 derbank was soon acquired for the softness  
 of his <sup>etch</sup>ings, and still more for the size of  
 them, some of his heads being the largest  
 that had then appeared in England. But  
 this very merit undid him; the time em-  
 ployed on such considerable works was by  
 no means compensated in the price. He  
 was reduced to want, and retiring to his  
 brother-in-law, died at Bradfield, and was  
 buried in the church there in 1697. After  
 his death, his widow disposed of his plates  
 to one Brown, a printseller, who made great  
 advantage of them, and left an easy fortune.  
 Vanderbank had three sons, the eldest had  
 some share in the Theatre at Dublin. The  
 youngest, William, a poor labourer, gave

\* I am informed that this head of Wood could not  
be done by P. Vanderbank the elder, whose arm was  
torn off in 1737. See Phil. Transf. for 1738. As I find  
no account of his second son, his name was probably  
Peter, and he might be an engraver.

Van-

Vanderbank engraved a set of heads for Kenner's History of England, they were designed by ~~Lauterel~~, Vanderbank executed from the conqueror to queen Elizabeth; the rest were finished by M. Vander-gutch.

He also graved after Verrio's paintings at Windsor, and some other histories, and did some plates which have his name in Tizon's Book of Iron-works. He appears too to have had some concern in a manufacture of tapestry; in the duke of Ancaster's sale was a suite of tapestry with Vanderbank's name to it.

Did a head of George duke of Albemarle,  
from a painting of Barlow, and another of  
John Shower, from a picture of his own;  
the latter is a small mezzotinto.

where he did two profile heads in

princess.

princes of Orange, yet dated 1690; and prints of Sir Matthew Hale, of George Baron de Goertz (this was in concert with Pine) of Dr. Humphrey Prideaux, and a plate with seven little heads of Charles II. and his queen, prince Rupert, prince of Orange, duke of York, duke of Monmouth, and general Moncke. There was another John Clarke, who lived in Gray's Inn; he engraved a quarto print of Rubens, and, probably, the vignettes for Bundy's translation of Catrou, and Rouille's Roman History, and the vignettes for lord Lansdowne's works. Gerard and Robert Vandergutch were also employed for the latter book.

scraped them. Brown, besides his mezzotintos, engraved the plates to his *Art of Painting*, 1669. See Payne Fisher's verses prefixed to that work. Brown's plates in that piece are chiefly copied from Bloemart's drawing-book. Trevethan is mentioned by Sanderson, but I know none of his works. To a print of bishop Ruffel is said, Thomas Dudley Anglus fecit 1679.

*PAUL VANSOMER,*

1678 } Another artist of no great fame, whom I give to compleat the list, and as I find them, not confining myself strictly to dates, which would be difficult to adjust, when there were so many of the profession about the same period. Vansomer at first executed many plates both graved and in mezzotinto after the works of Lely; his drawings were commonly made in two \* co-

hours by Gaspar Baptist, and sometimes by Lemens; and he was so expeditious as to finish a half-length plate in a summer's day—sufficient reason for me not to specify all his works. Before he arrived here, he had performed a print of Charles duke of Bavaria and his secretary in 1670. His mark was thus \* . Another print was of a countess of Meath after Mignard; and a third of the duke of Florence and his secretary. Towards the end of his time the art was sunk very low: Vertue ~~found~~ <sup>that</sup> at about the year 1690 Verrio, Cooke and Laguerre, could find no better persons to engrave their designs than S. Gribelin and Paul Vanfomer—he might in justice have added that the engravers were good enough for the painters; and in 1702 that J. Smith was forced to execute in mezzotinto the frontispiece to signor Nicolò Cosimo's book of music. But before we come to that

period we have one or two more to mention, and one a good artist :

## ROBERT WHITE

Was born in London 1645, and had a natural inclination to drawing and etching, which he attempted before he had any instructions from Loggan of whom he learned, and for whom he drew and engraved many buildings. What distinguished him was his admirable success in likenesses, a merit that would give value to his prints, though they were not so well performed. Many of his heads were taken by himself with a black lead pencil on vellum: Mr. West has several, particularly his own head at the age of sixteen. Vertue thought them superior to his prints. The heads of Sir Godfrey Kneller and his brother in Sandrart were engraved from drawings by White, whose portrait Sir Godfrey drew in return. Many of the portraits in Sandford's curious coronation

coronation of James II. were done from the life, as Vertue thought, by White. In 1674 he graved the first Oxford Almanac, as he did the title-plate designed by Adr. Hennin to the History and Antiquities of that University. He also engraved Moulcke's funeral. For a plate of the king of Sweden he received 30*l.* from one Mr. Sowters of Exeter. Of his own works he made no regular collection, but when he had done a plate, he rolled up two or three proofs, and flung them into a closet, where they lay in heaps. Thus employed for 40 years together he had saved about four or five thousand pounds, and yet by some misfortunes or waste at last, he died \* in indigent circumstances, and his plates being sold to a printseller in the Poultry, † enriched the purchaser in a few years. As no man per-

\* He died suddenly at his house in Bloomsbury in 1704.

† Vertue says the same success attended Cooper and Bowles, printellers: a profession which Vertue thought very justly did not deserve to thrive beyond the laborious artists whom they employed.

haps has exceeded Robert White in the multiplicity of English heads, it may be difficult to give a compleat catalogue of them, yet as my author had formed a long list, it would be defrauding curious collectors if I refused to transcribe it; one would not grudge a few hours more, after the many that have been thrown away on these idle volumes. It is a profile from the whole length at St. James's, which has since appeared, by Vanderdort's catalogue, to be Edward IV. by Belcamp: There is also a wooden cut done temp. Eliz. which agrees with Vanderdort's account.

# GEORGE WHITE,

Son of Robert, finished some of his father's plates, and engraved others himself, but chiefly practised in mezzotinto, in which he succeeded, and had sometimes 20 guineas for a plate. His best, I think, are of Sir Richard Blackmore, and Sylvester Petyt, the latter remarkably fine. He also painted in oil, and more frequently in miniature. One of his first large heads, in his father's manner, was of James Gardiner bishop of Lincoln. He was alive so late as the year 1731, when a print by him of bishop Weston is dated.

# ARTHUR SOLY

1683 } Was much employed by Robert White, who drew his head in black lead, which was engraved in 1683. Himself did prints of Richard Baxter and Tobias Crisp.

HAMLET

## HAMLET WINSTANLEY

Learned to draw under the Knellers, being designed for a painter, and from thence went to Italy; but on his return seems to have addicted himself to engraving. He etched and published the earl of Derby's collection of pictures, as his father Henry had done several views of Audley-inn, which he dedicated to James II. that building being then a \* royal palace: he added too an inscription in honour of Sir Christopher Wren. This set of prints is very scarce; the plates are reserved by the descendents of the earls of Suffolk. Henry was clerk of the works at Audley-inn in 1694, and in 1700 clerk of the works at Newmarket. It

\* It had been purchased by the crown, but much of the money not being paid, king William returned it to the family; but bought as much tapestry there as cost him 4500 *l*. It is remarkable that in the church of Walden, which is beautifully light and striking, is still preserved very fresh the atchievement of the memorable Frances countess of Essex and Somerset.

was this artist, I believe, who had a \* house near Audley-inn at Littlebury, where were several mechanic tricks to surprize the populace, and known by the name of Winstanley's wonders. These childish contrivances, I suppose, he learned in Italy, where they do not let their religion monopolize all kind of legerdemain. In the Villa Borghese at Rome, amidst emperors, heroes, and philosophers, I have seen a puppet-show in a box that turned like a squirrel's rolling cage, in the same palace was the noble statue of Seneca dying in the bath, and a devil that started out of a clock-case, as you entered the chamber. There is a print of James earl of Derby from a painting by Hamlet Winstanley, another of Peploe bishop of Chester, and his own head by himself. The two last were executed by Faber. Winstanley the father was projector and builder of the Eddystone light-

- Was cotemporary with Robert White; and a Scotchman. Vertue had seen some writing graved by him in a book in 1681. He made a print of himself in a fur cap, and another in a wig. His best work was a plate of Ben Johnson. His other things

are heads of Pythagoras; Dr. Mayern; John Ray; Dr. Morton; archbishop Sancroft; George Parker; Charles Snell, writing-master; admiral Ruffel; and judge Pollexfen.

## J O H N   S T U R T

Was born April 6, 1658, and at the age of 17 was put apprentice to Robert White, and did several prints, but of no great merit. However he was exceedingly admired by Mr. Thoresby,\* who in his museum had the Lord's prayer engraved by Sturt, in the compass of a silver penny, the ten commandments, &c. in the size of a medal; and the gospel of St. Matthew engraved in octavo. Sturt's capital work was his Common-prayer-book, published by subscription in 1717: it is all engraven

\* Ducat. Leod. 498, 513. ~~Mr. Thoresby~~ mentions two other engravers, Mr. Robert Jackson, and Mr. Francis Bragge.

very neatly, on silver plates, in two columns, with borders round each plate; small histories at top, and initial letters. It is a large octavo, and contains 166 plates, besides 22 in the beginning, which consist of the dedication, table, preface, calendar, names of subscribers, &c. Prefixed is a bust of George I. in a round, and facing it, those of the prince and princess of Wales. On the king's bust are engraven the Lord's prayer, creed, commandments, prayers for the royal family, and the 21st psalm, but so small as not to be legible without a magnifying glass. He also engraved a Companion to the Altar, on plates of the same size, and a set of 55 historic cuts for the Common prayer book in small octavo. He copied faithfully, as may be seen by the English translation of Pozzo's Perspective, published by James in folio. Sturt, grown old and poor, had a place offered him in the Charter House, which he refused, and died about the age of 72. He had received near 500 l. of Mr. James Anderson of Edinburgh, to grave plates for his fine book of

Scottish Records, &c. but did not live to compleat them.

## Mr. L U T T E R E I

Was bred at New-inn, but having a disposition to drawing, took to crayons and abandoned the law. Having a mechanic head, and observing the applause given to the new art of mezzotinto, he set himself to discover the secret, for so it was still kept. His first invention for laying the grounds was by a roller, which succeeded pretty well, but not to his content, that method being neither so sharp nor casting, as the true way. Upon this he persuaded his friend Loyd, who kept a print-shop in Salisbury-street in the Strand, to bribe one Blois, who used to lay grounds for Flooteling, and was then going to Holland, to discover the mystery. The profits were to be divided, Lutterel scraping and Loyd selling the prints. Forty shillings purchased the secret;

cret; but when purchased, Loyd would not communicate it to Lutterel, on which they quarrelled. In the interim

Then apprentice to a callico-printer, visiting Lutterel, caught the passion of learning mezzotinto; and hearing that Loyd was possessed of the secret, and being forced to absent himself from his business upon an intrigue, had recourse to Loyd, who, though master of the arcanum, was not capable of putting it in execution. Becket offered his service, was instructed in the use of the chisel, and entered into articles of working for Loyd. Lutterel in the mean time pursued his old method, and published a print of a woman blowing out a candle backwards, which sold mightily. Soon after he got acquainted with Vansomer, and from him learned the whole process. Becket

fell again into the same trouble, and Lutterel assisting him, they became intimate; but Becket marrying a woman of fortune, set up for himself, and Lutterel did many heads for him, being more expeditious and drawing better than Becket; but they were often finished by the latter. Lutterel's best print was a portrait of Le 'Piper, the painter; few of his works have his name to them. He was the first that laid grounds on copper \* for crayons, a method afterwards practised by Faithorne. One of Becket's best is a print of a lady Williams, whole length. I have run these lives into one another, finding them blended by Virtue, and naturally connected.

I have now carried this work down to the year 1700. If the art did not make great improvements after that period, at least it was enlarged, and not so restricted to portraits. Historic subjects came into vogue too. If no great matter was performed,

\* Some of Lutterel's works in this manner are in queen Caroline's closet at Kensington.

that age did not deserve so much reproach as we do. Few good pictures were then imported. How many noble collections have been formed since, and yet how few prints appear of intrinsic merit! I have mentioned those of Mr. Strange, which are worthy of any country, and of the masters he has imitated. Mac Ardell has done a few in mezzotinto, that shew what that branch is capable of; but our collections are still far from being exhausted; and yet I do not forget how many beautiful landscapes of Claud Lorrain and Gaspar Poussin we owe to the late Mr. Pond. Nor is this wholly the fault of artists; if the public would neglect whatever is not worthy of their country and of its riches, nor pay great prices for hasty performances, it is not credible that we can want either the genius or industry of the French, though hitherto their prints in general are at least as much better than ours, as their prices are more reasonable.

The end of king William's reign was illustrated by a genius of singular merit in his way,

Mr. J O H N S M I T H,

1700 } " The best mezzotinter that has appeared, who united softness with strength, and finishing with freedom. To posterity perhaps his prints will carry an idea of something burlesque; peruke of outrageous length flowing over suits of armour compose wonderful habits. It is equally strange that fashion could introduce the one, and establish the practice of representing the other, when it was out of fashion. Smith excelled in exhibiting both as he found them in the portraits of Kneller, who was less happy in what he substituted to armour. In the kit-cat-club he has poured full-bottoms chiefly over night-gowns: if those streams of hair were incommode in a battle,

battle, I know nothing they were adapted to, that can be done in a night-gown.

I find little account of Smith's life, except that he served his time with one Tillet, a painter in Moorfields, and that as soon as he became his own master, he applied to Becket, and learned from him the secret of mezzotinto, and being farther instructed by \* Vander Vaart, was taken to work in Sir Godfrey's house, and as he was to be the publisher of that master's works, no doubt received considerable hints from him, which he amply repaid. Vertue, who was less diligent in his inquiries after the works of mezzotinters, has left no regular catalogue of Smith's works, nor, as they are so common, shall I attempt one. This list is already swelled to too large a size; and I shall forbear particularizing the prints of those that are to follow, which being of so fresh a date, cannot be scarce. Smith had composed two large volumes with proofs of his

own plates, which I have seen in his hands ; he asked 50*l.* for them : what became of them I know not.\* His finest works are, duke Schomberg on horseback ; that duke's son and successor, Maynard ; the earls of Pembroke, Dorset, and Albemarle ; three plates, with two figures in each, of young persons or children, in which he shone ; William Anstruther ; Thomas Gill ; William Cowper ; Gibbons and his wife ; queen Anne ; duke of Gloucester, whole length with a flower-pot ; duke of Ormond ; a very curious one of queen Mary in a high head, fan and gloves ; earl of Godolphin ; the duchess of Ormond, whole length with a black ; and Sir George Rooke. There is a print by him of James II. with an anchor, but no inscription, which not being finished when the king went away, is so scarce, that I have known it sold for above a guinea. Besides portraits, Smith performed many historic pieces, as the loves of the gods

from Titian at Blenheim in ten plates; Venus standing in a shell, from a picture by Correggio, that was at Buckingham-house; Venus and Cupid on a couch; a Satyr and woman after Luca Jordano, and many more, of which perhaps the most delicate is a holy family with angels, after Carlo Maratti. There is a print of himself after Sir Godfrey Kneller.

### SIMON GRIBELIN

1707 } Was born at Blois in 1661, and  
came to England about 1686; but it was above twenty years before he was noticed. The first work that raised his reputation was the tent of Darius, published in 1707. This was followed by a set of the Cartoons; their success was very great, having never been completely engraved before; but they were in too small a volume, nor had Gribelin any thing of greatness in his manner or capacity: His works  
have

have no more merit than finicalness, and that not in perfection, can give them. He afterwards published six historic pieces from pictures in the royal collection at Kensington, and the cieling of the banquetting-house ; but none of his plates give any idea of the style of the masters they copied. His prints at best are neat memorandums. He executed a great number of small plates on gold, silver and copper ; chiefly for books, but was fittest to engrave patterns for goldsmith's work. I have a thick quarto collected by himself, of all his small plates, which was sold by his son after his decease, which happened, without any previous sickness, in Long-acre. He caught cold by going to see the king in the house of lords ; fell ill that night, continued so next day, and died the third, aged 72. He left a son and daughter : The son graved in his father's manner, and went to Turkey in the retinue of the earl of Kinnoul, to draw prospects, but returned in about two years. Gribelin the father engraved some portraits, as duke Schomberg,

Sir William Dawes, and a small whole length of the earl of Shaftsbury for the characteristics.

Sir NICHOLAS DORIGNY,

Born in France, at Paris, in 1657, was son of Michael Dorigny by a daughter of Vouet, the painter. His father dying while he was very young, he was brought up to the study of the law, which he pursued till about thirty years of age, when being examined, in order to being admitted to plead, the judge finding him very difficult of hearing, advised him to relinquish a profession, to which one of his senses was so ill adapted. He took the advice, and having a brother a painter at Rome, determined to embrace the same occupation; and shut himself up for a year to practice drawing, for which he probably had better talents than for the law, since he could sufficiently ground himself in the latter in a twelvemonth. Repairing to Rome  
and

and receiving instructions from his brother, he followed painting for some years, when having acquired great freedom of hand, he was advised to try etching. Being of a flexible disposition, or uncommonly observant of advice, he turned to etching, and practised that for some more years; when looking into the works of Audran, he found he had been in a wrong method, and took up the manner of the latter, which he pursued for ten years—we are at least got to the fiftieth year of his age, if Vertue's memory or his own did not fail him, for Vertue received this account from himself. He had now done many plates, and lastly the gallery of Cupid and Psyche after Raphael—when a new difficulty struck him. Not having learned the handling and right use of the graver, he despaired of attaining the harmony and perfection at which he aimed—and at once abandoning engraving, he returned to his pencils—a word from a friend would have thrown him back to the law—however, after two months, he was persuaded to apply to the graver, and receiving

ceiving some hints from one that used to engrave the writing under his plates, he conquered that difficulty too, and began with a set of planets. Mercury, his first, succeeded so well, that he engraved four large pictures with oval tops, and from thence proceeded to Raphael's transfiguration, which raised his reputation above all the masters of that time.

1711 } At Rome he became known to  
several Englishmen of rank, who  
persuaded him to come to England and engrave the Cartoons. He arrived in June 1711, but did not begin his drawings till the Easter following, the intervening time being spent in raising a fund for his work. At first it was proposed that the plates should be engraved at the queen's expence, and to be given as presents to the nobility, foreign princes and ministers. Lord-treasurer Oxford was much his friend; but Dorigny-demanding 4 or 5000*l.* put a stop to that plan; yet the queen gave him an apartment at Hampton-court with necessary perquisites.

The work however was undertaken by subscription at four guineas a set. Yet the labour seeming too heavy for one hand, Dorigny sent to Paris for assistance, who were Charles Dupuis and Dubosc, who differed with him in two or three years, before the plates were more than half done. What relates farther to those engravers will follow hereafter.

April 1, 1719, Sir Nicholas presented to king George I. two compleat sets of the Cartoons, and a set each to the prince and princess. The king gave him a purse of 100 guineas, and the prince a gold medal. The duke of Devonshire, of whom he had borrowed 400*l.* remitted to him the interest of four years; and in the following year procured him to be knighted by the king. He painted some portraits here, not with much success in likeness; and his eyes beginning to fail, he retired to France in 1724, and died at Paris in 1746. His collection of drawings had been sold before in 1723. Among them were some after Dominichino and Guercino, and one after Daniel de Volterra,

terra, which Vertue preferred to all his works. There were an \* hundred and four heads, hands and feet, traced off from the Cartoons. While he was making drawings of the Cartoons, a person in London offered him 200*l.* for them, but he would not conclude any agreement till the plates were finished. They were sold at his auction for 52 guineas. The total amount of his drawings came to 320*l.* His whole number of plates large and small was 153.

## • CHARLES DUPUIS,

Besides part of the Cartoons, engraved some plates of the story of Charles I. but differing with Dorigny, and the climate not agreeing with him, he returned to Paris, where he died suddenly in 1743. A younger brother of his came over, and did some

plates, but returned soon, finding greater encouragement at home.

## CLAUDE DUBOSC

Quitted Dorigny at the same time with Dupuis, but settled here; and undertook to engrave the Cartoons \* for printsellers. His next engagement was a set of the duke of Marlborough's battles, to be performed in two years for fourscore pounds a plate, having no aid but Du Guernier who had been in England for some years, and who was chiefly employed in etching frontispieces for books and plays; but that help not being sufficient, Dubosc sent to Paris for † Beauvais and Baron, who assisted him to compleat the work, in 1717. He afterwards took a shop and sold prints. Pierart having published his Religious Ceremonies in 1733, Dubosc undertook to give that

weekly by subscription. Himself did a plate  
from the fine picture of Scipio's continence  
by Nicolo Poussin at Houghton. His por-  
trait was drawn by Smybert.

## LEWIS DU GUERNIER

1708 } Studied under Chatillon at Paris,  
and came to England in 1708, but  
with very moderate talents, though he was  
reckoned to improve much here by drawing  
in the academy, which was then frequented,  
though established only by private contri-  
butions among the artists. Du Guernier  
was chosen director of it, and continued so  
to his death, which was occasioned by the  
small-pox, Sep. 19, 1716, when he was  
but 39 years old. His chief business was  
engraving frontispieces for plays, and such  
small histories. His share in the plates of  
the duke of Marlborough's battles has  
O 3 been

been mentioned. At the instance of lord Halifax he did a large print of Lot and his two daughters from Michael Angelo di Caravaggio, and two ~~to~~ <sup>by</sup> ~~en~~ <sup>engraved</sup> heads of the duke and duchess of Queensberry.

## GEORGE BICKHAM,

1709 } Cotemporary with the last, engraved a few heads, as Sir Isaac Newton's, and bishop Blackall's; a folio sheet with six writing-masters, one of whom, George Shelly, he engraved also from the life 1709, and many other works. He retired to Richmond, and in May 1767, being then living, sold part of his plates, and stock in trade by auction.

The latter died in Westminster 1721, aged between 60 and 70, having been many years in England. His pictures, which were not extraordinary, were sold in 1723. Kip engraved an inside view of the Danish church built by Cibber, and died at near 70 years of age in 1752, in a place called Long-ditch, Westminster. He left a daughter whom he had brought up to painting.

His prints mentioned by Ames, are of James Owen, and a woman called Yorkshire Nan. Some of these men seem to have been below Vertue's notice, and consequently are only mentioned here, that I may not seem to have overlooked them. Indeed, though Vertue thought that the art raised it's head a little after the arrival of Dorigny, I find very few, except himself, who can pass for tolerable masters.

## JOSEPH SIMPSON

Was very low in his profession, setting arms on pewter plates, till having studied in the academy, he was employed by Tillemans on a plate of Newmarket, to which he was permitted to put his name, and which, though it did not please the painter, served to make Simpson known. He had a son of both his names, of whom he had conceived extraordinary hopes, but who died in 1736 without having attained much excellence.

## PETER VAN GUNST

## ROBERT, or ROGER WILLIAMS,

A Welshman, was, I believe, senior to many I have mentioned. He worked only in mezzotinto, in which he had good success. His print of Sir Richard Blackmore is uncommonly fine. He contracted a great lameness from a sprain, for which he had his leg cut off, and lived many years afterwards.

Of Antwerp, was scholar of one Boutats, ~~and~~ master of Vertue, who was told by him that Boutats had four daughters and twenty sons, of whom twelve were engravers, and that one of them, Philip, ~~had~~ twelve sons, of whom four were engravers. Vander-gutch's own family, though not so numerous, has been alike dedicated to the art. When Michael arrived here, ~~does~~ not appear. He practised chiefly on anatomic figures; but sometimes did other things, as a large print of the royal navy, on a sheet and half, designed by one Baston. His master-piece was reckoned a print of Mr. Savage.

## JOHN VANDERGUTCH,

Who was born in 1697. He learned to draw of Cheron, and of his father to engrave; but chiefly practised etching, which he sometimes mixed with the other. He studied too in the academy. His six academic figures after Cheron were admired; and he is much commended by Cheselden in the preface to his Osteology, in the prints of which he had much share, as he had in the plates from Sir James Thornhill's cupola of St. Paul's. There is a print by him from Poussin's picture of Tancred and Erminia.

## B E R N A R D

B E R N A R D L E N S

Was son of a painter of the same names, who died Feb. 5, 1708, aged 77, and was buried in St. Bride's. He left four or five MSS. volumes of collections on divinity. His son, the subject of this article, was a mezzotinto-scraper, and drawing-master; sometimes etched, and drew for Sturt and other engravers. He copied the Judgment of Paris in mezzotinto from Sir Peter Lely, and did a multitude of small prints in the same way, chiefly histories and landscapes, and drew several views in England in Indian ink. He died April 28, 1725, aged 66. His son was the incomparable painter in water-colours, Bernard Lens, whose copies from Rubens, Vandyck, and many other great masters, have all the merit of the originals, except what they deserve too, duration. He was drawing-master to the duke of Cumberland and the princesses

## — S C O T T I N,

No eminent artist, as appears by his print from Vandyck's Belisarius at Chiswick. If the two fine pictures on this subject are compared, it must not be by setting Scottin's near Mr. Strange's. To weigh the merits of Salvator and Vandyck impartially, Mr. Strange should engrave both; I mean, to judge how each has delivered the passions, in which decision we should not be diverted by the colouring. Indeed, one would suppose that Vandyck had seen Salvator's performance, and despairing to exceed him in the principal figure, had transferred his art and our attention to the young soldier. Salvator's Belisarius reflects on his own fortune, Vandyck's warrior moralizes on the instability of glory. One asks one's self which is more touching, to

Born at Amsterdam, did prints of Sir Bui-  
 strode Whitlocke, Robert Warren, A. M.  
 and Joseph Warder, a physician; some of  
 the plates in the Vitruvius Britannicus; a  
 large view of St. Peter's church at Rome,

Born in Holland, drew many pictures from the life on \* velom with a pen, and scraped several mezzotintos, both from paintings and from nature. His most considerable works, and those not excellent, were portraits of the founders of colleges at Oxford and Cambridge. He died at Bristol in May 1721. His son,

land at three years old. His first instructions he received from his father ; afterwards he studied in Vanderbank's academy. He executed a prodigious number of portraits, some of which are bold, free and beautiful. To him we owe the kit-cat-club, the beauties at Hampton-court, and have reason to wish that we had the same obligation to him for those at Windsor, and of the admirals at Hampton-court. He died of the gout, very few years ago, at his house in Bloomsbury. His widow married Mr. Smith, a lawyer.

## EDWARD KIRKALL,

Son of a lock-smith, was born at Sheffield in Yorkshire, where he attained the rudiments of drawing, which however were long before they arrived at any perfection. He came to London, and for some time supported himself by graving arms, stamps, ornaments, and cuts for books. \* The lat-

ter gained him an immortality, which with all his succeeding merit he perhaps would have missed, if his happening to engrave the portrait of a lady D'ance had not introduced him to the remark of Mr. Pope, who describes her

With flow'rs and fruit by bounteous Kirkall drest.

At length, drawing in the academy, and making some attempts in chiaro scuro, he discovered a new method of printing, composed of etching, mezzotinto and wooden stamps, and with these blended arts he formed a style, that has more tints than ancient wooden cuts, resembles drawings, and by the addition of mezzotinto, softens the shades on the outlines, and more insensibly and agreeably melts the impression of the wooden stamps, which give the tincture to the paper and the shades together. He performed several prints in this manner, and did great justice to the drawing and expression of the masters he imitated. This invention, for one may call it so, had much success, much applause, no imitators. — I

suppose it is too laborious, and too tedious. In an opulent country where there is great facility of getting money, it is seldom got by merit. Our artists are in too much hurry to gain it, to deserve it.

## JAMES CHRISTOPHER LE BION,

Another inventor in an age which however has not been allotted any eminent rank in the history of arts. He naturally follows Kirkall, as there was some analogy in their pursuits. The former, if I may say so, attempted to print drawings, the latter to print paintings. He was a Fleming, and very far from young when I knew him, but of surprizing vivacity and volubility, and with a head admirably mechanic, but an universal projector, and with at least one of the qualities that attend that vocation, either a dupe or a cheat; I think the former, though as most of his projects

projects ended in the air, the sufferers believed the latter. As he was much an enthusiast, perhaps like most enthusiasts he was both one and t'other.

He discovered a method of giving colour to mezzotinto, and perfected many large pictures, which may be allowed very tolerable copies of the best masters. Thus far his visions were realized. He distributed them by a kind of lottery, but the subscribers did not find their prizes much valued. Yet surely the art was worth improving, at least in a country so fond of portraits. Le Blon's method of mezzotinto at least adds the resemblance of colour.

He had another merit to the public, with which few inventors begin; he communicated his secret, in a thin quarto in French and English, intitled, "Coloritto, or the Harmony of Colouring in Painting, reduced to Mechanical Practice under easy Precepts and infallible Rules." Dedicated to Sir Robert Walpole. In the preface he says that he was executing anatomic figures for Monsieur St. André. Some heads co-

loured progressively, according to the several gradations, bear witness to the success and beauty of his invention. In 1732 he published a treatise on Ideal Beauty, or le Beau Ideal, dedicated to lady Walpole. It was translated from the original French of Lambert Hermanfon Ten Kate.

He afterwards set up a project for conveying the Cartoons in tapestry, and made some very fine drawings for that purpose. Houses were built and looms erected in the Mulberry-ground at Chelsea, but either the expence was precipitated too fast, or contributions did not arrive fast enough: The bubble burst, several suffered, and Le Blon was heard of no more.\*

men was employed by him to copy his pictures in mezzotinto, which he did, and from other masters with good success. He was not so free in his manner as Smith but now and then approached very near to that capital artist, as may be seen in his plates of Henry Rouvigny earl of Galway, of earl Cadogan, and particularly of lord Cutts in armour with a truncheon. Simon died about the year 1755. His collection of prints was sold by auction at Darres's printshop in Piccadilly over-against Coventry-street, Nov. 3d, 1761.

## L. BOITARD

Was a Frenchman, and a very neat workman. He engraved chiefly for books, and was employed by Dr. Woodward, by Dr. Douglas on anatomic figures, and by Dr. Meade. He engraved a large print of the rotunda after Paolo Panini, and the plates for Mr. Spence's Polymetis. He married

an Englishwoman, and left a son and a daughter. Boitard's father, who went often to Holland to purchase curiosities for Dr. Meade, drew with the pen, in the manner of La Fage, and often set his name to his drawings with the time he had employed on them, which sometimes, even for large pieces, did not exceed fifteen minutes. Showing one of his designs to Dorigny, and boasting of this expedition, Sir Nicholas told him he should have thought a man of his vivacity might have executed two such in the time.

plate from Watteau, and engaged to do another from Titian in the king's collection, for Monsieur Crozat, for which he was to receive 60*l.* sterling. While at Paris, they both sat to Vanloo. Baron has executed a great number of works, a few portraits, and some considerable pictures after the best masters; as the family of Cornaro at, New-Numberland-house; Vandyck's family of the earl of Pembroke at Wilton; Henry VIII. giving the charter to the company of surgeons; the equestrian figure of Charles I. by Vandyck at Kensington; it's companion, the king, queen, and two children; and king William on horseback with emblematic figures, at Hampton-court. His last considerable work was the family of Nassau by Vandyck at the earl of Cowper's. Baron died in Penton-square, Piccadilly, Jan. 24th, 1762.

**HENRY:**

## HENRY GRAVELOT

Was not much known as an engraver, but was an excellent draughtsman, and drew designs for ornaments in great taste, and was a faithful copyist of ancient buildings, tombs, and prospects, for which he was constantly employed by the artists in London. He drew the monuments of kings for Vertue, and gave the designs, whose invention was necessary, for Pine's plates of the tapestry in the House of Lords. He had been in Canada as secretary to the governor, but the climate disagreeing with him, he returned to France, whence he was invited over by Dubosc. He was for some time employed in Gloucestershire, drawing churches and antiquities. Vertue compares his neat manner to Picart, and owns that in composition and design he even excelled his favourite Hollar. He sometimes attempted painting small histories and conversations.

Of his graving are the prints to Sir Thomas Hanmer's edition of Shakespear, and many of them he designed; but it is his large print of Kirkstall-abbey which shows how able an engraver he was.

Need but be mentioned, to put the public in mind of the several beautifull and fine works for which they are indebted to him. The chief of them are, the ceremonies used at the revival of the order of the Bath by king George I. the prints from the tapestry in the House of Lords, representing the destruction of the Spanish Armada, a book rivalling the splendid editions of the Louvre; and the fair edition of *Horace*, the whole text engraven, with ancient basreliefs and gems illustrating the subjects. He has given too a print of the House of Commons, some ancient charters, and other things. His head painted by  
Mr.

Mr. Hogarth in the manner of Rembrandt is well known from the print.

## A R T H U R P O N D,

Another promoter of meritorious works, was concerned with Mr. Knapton in setting forth the noble volume of illustrious heads, engrav'd by Houbraken and Vertue, and which might still be enlarged. Mr. Pond was author too of the design for engraving the works of Claud Lorrain and Gaspar Pouffin, in which several numbers were exhibited; a few landscapes from Rembrandt, and other masters, and prints from Paolo Panini followed. He also published many prints from the drawings, and a set of Caricaturas after Cavalier Ghezzi. Mr. Pond had singular knowledge in hands, but considerably more merit as an editor than as a painter, which was his profession both in oil and crayons. He had formed a capital collection of etchings by the best masters,

masters, and of prints, all which he disposed of to a gentleman in Norfolk: they have since been sold by auction, as were his cabinet of shells after his death. He etched his own head, Dr. Meade's and Mr. Sadler's, Pope's and lord Bolingbroke's.

## HENRY FLETCHER

1729 } Published a print, the story of Bathsheba, from Sebastian Concha, his first essay on his own account. He also engraved a print of Ebenezer Pemberton, minister of Boston.

## CAREY CREED

1730 } Published a set of plates from the statues and busts at Wilton.

JOSEPH

## JOSEPH WAGNER,

1733 } A Swiss, came to England in  
 1733, aged between 20 and 30.  
 He had studied painting a little, but being  
 encouraged by Amiconi, engraved after the  
 works of the latter. His first productions  
 were plates of the three princesses, Anne,  
 Amelie, and Caroline; his next, a whole  
 length of the czarina Anne. He afterwards  
 executed two print of boys, and about an  
 hundred plates, views of Roman antiqui-  
 ties, most of them copied from old engrav-  
 ings, and from Canaletti some prospects of  
 Venice, whither he accompanied Amiconi,  
 intending to keep a print-shop there.

## THOMAS PRESTON

Did a print of Mr. Pope, and a large head  
 of admiral Blake, with ships under it.

## JOHN

## JOHN LAGUERRE

Was son of Lewis Laguerre, a painter of history, by whom he was educated to the same profession, and had a genius for it—but neglecting to cultivate it, he took to the stage, in which walk he had merit, as he had success in painting scenes for the theatre in Covent-garden, to which he belonged. He engraved a print of Falstaffe, Pistol and Dol Tearsheet, with other theatric characters, alluding to a quarrel between the players and patentees, and a set of prints of Hobbs the Well, which sold considerably; but he died in indifferent circumstances in March 1748. Lewis the father etched a print of Midas sitting in judgment between Pan and Apollo.

## PETER FOURDRINIÈRE

Who died a few years ago, excelled in engraving architecture, and did many other things for books.

## JOHN GREEN

A young man who made great proficiency in graving landscapes, and other things; particularly heads of Thomas Rowney, Thomas Shaw, D. D. W. De la Harpe, D. D. and the plates for Borlase's Natural History of Cornwall, and many of the seals, was born at Hales Owen in Shropshire, and bred under Basire, an engraver of maps, &c. &c. of the present engraver to the Antiquarian Society. Green was employed by the University of Oxford, and continued their almanacs; but died immaturesly three or four years

years ago. His brother is in the same business.

Besides all I have mentioned, dispersed in Vertue's MSS. I have since found some more names, of whom the notices are so slight, that it is not worth while to endeavour finding proper places for them. Their names are, Morellon le Cave,\* a scholar of Picart; J. Cole; P. Williamson; G. Lumley, who settled at York; P. Tempest; Peter Coombe; P. Pelham; E. Kyte; George Kitchin, who did heads of Mahomet and Mustapha, Turks belonging to George I.; and William Robins, Alexander Brown, and De Blois, mezzotinters: Van † Bleek, who executed of late years a fine print of Johnson and Griffin, players; and A. Van Haecken, who has given a head of Dr. Pepusch and some others. John Stone the younger drew and engraved one of the

plates for Dugdale's Warwickshire. T. Pin-

Leeds; S. Boisseau, a plate for Aaron  
Hill's History of the Ottoman Empire; and  
Th. Gardner, a set for the Common Prayer  
paraphrased, by James Harris, 1735. Se-  
veral English portraits have been engraved  
abroad, particularly by Cornelius Van Da-  
len; Arthur De Jode, and P. De Jode; J.  
De Leuw; Pontius; Edelinck, and Pi-

unknown hands.

To the conclusion of these Memoires,  
and for a separate article, I reserve an ac-  
count of him, to whom his Country, the  
artists whose memories he has preserved,  
and the reader, are obliged for the materials  
of this work.

On living artists it is neither necessary nor  
proper to expatiate. The task will be easy  
to others hereafter to continue the series.

duction of the art into England to the  
present year; and the chief acts of its

the continuation will afford a brighter list, one may augur, from the protection given to the arts, from the riches and flourishing state of our dominion, and from the masters we actually possess. \* Houston,† Mac Ardell,‡ and Fisher, have already promised by their works to revive the beauty of mezzotinto. The exquisite plates of architecture, which daily appear, are not only worthy of the taste which is restored in that science, but exceed whatever has appeared in any age or country. † Mr. Rooker is the Marc Antonio of architecture. Vivares and some others, have great merit in graving landscape. Major's works after Teniers, &c. will always make a principal figure in a collection of prints, and prevent our envying the excellence of the French in that branch of the art. I could name more, if it would not look like flattery to the living;

**T**HIS volume, the Editor was sensible at its compilation, was the most imperfect part of Vertue's and his own accounts of the History and Progress of the Arts in England. It would not be difficult at present to give a much more compleat deduction of the Graphic Art in its different branches. But not only the indolence that attends age, and frequent illnesses, have indisposed the Author from enlarging his plan; more pardonable reasons determined him to make very few additions to this new edition, nor should he have thought of republishing the work, unless solicited by Mr. Doddsley. The indulgence of the public ought to imprint respect, not presumption; and instead of trespassing anew on that lenity, the author has long feared he should be reproached, that

. Detinuit nostras numerosus Horatius aures;

a quotation he should not dare to apply to himself, if adjectives in *osus*, as *famosus*, &c. were not most commonly used by Latian authors in a culpatory sense; and thus *numerosus* only means *too voluminous*. Another reason for not having enlarged the preceding work was, that it would interfere with the plan laid down of terminating the history of

the Arts at the conclusion of the last reign. In fact, a brighter æra has dawned on the manufacture of prints. They are become almost the favourite objects of collectors, and in some degree deserve that favour, and are certainly paid as if they did. Engraved landscapes have in point of delicacy reached unexampled beauty. A new species has also been created; I mean, Aqua-Tinta—besides prints in various colours.

Perhaps it would be worth while to melt down this volume, and new-cast it, dividing the work into the several branches of Woodcuts, Engravings, Etchings, Mezzotints, and Aqua-Tints. A compiler might be assisted by some new publications, as the Essays on Prints, Strutt's Dictionary of Engravers, and a recent History of the Art of Engraving in Mezzotinto, printed at Winchester, wherein are mentioned foreign notices on the Arts.

Were I of authority sufficient to name my successor, or could prevail on him to condescend to accept an office which he could execute with more taste and ability; from whose hands could the public receive so much information and pleasure as from the author of the Essay on Prints, and from the Tours, &c.? And when was the public ever instructed by the pen and pencil at once, with equal excellence in the style of both, but by Mr. Gilpin?

Mr. GEORGE VERTUE.

**T**HE ensuing account is drawn from his own notes, in which the highest praise, he ventures to assume, is founded on his industry—How many men in a higher sphere have thought that single quality conferred many shining others! The world too has been so complaisant as to allow their pretensions. Vertue thought the labour of his hands was but labour—the Scaligers and such book-wights have mistaken the drudgery of their eyes for parts, for abilities—nay, have supposed it bestowed wit, while it only swelled their arrogance, and unchained their ill-nature. How contemptuously would such men have smiled

at a ploughman, who imagined himself authorized to abuse all others, because he had turned up more acres of ground!—and yet he would have toiled with greater advantage to mankind.

George Vertue was born in the parish of St. Martin's in the Fields, London, in the year 1684. His parents, he says, were more honest than opulent. If vanity had entered into his composition, he might have boasted the antiquity of his race: two of his name were employed by Henry VIII. in the board of works; but I forget; a family is not ancient, if none of the blood were above the rank of ingenious men two hundred years ago.

About the age of thirteen he was placed with a master who engraved arms on plate, and had the chief business of London; but who being extravagant, broke and returned to his country, France, after Vertue had served him between three and four years. As the man was unfortunate, though by his own fault, the good-nature of the scholar has concealed his name. As it is proper the  
repub-

republic of letters should be acquainted with the minutest circumstances in the life of a renowned author, I question if Scaliger would have been so tender.

Returned to his parents, Vertue gave himself entirely to the study of drawing for two years; and then entered into an agreement with Michael Vandergutch for three more, which term he protracted to seven, engraving copper-plates for him, when, having received instructions and advice from several painters, he quitted his master on handsome terms, and began to work for himself. This was in the year 1709. The first twelvemonth was passed in drawing and engraving for books.

The art was then at the lowest ebb in England. The best performers were worn out: the war with France shut the door against recruits; national acrimony, and the animosity of faction diverted public attention from common arts of amusement. At that period the young engraver was recommended to Sir Godfrey Kneller, whose reputation, riches, parts, and acquaintance with

with the first men in England supported what little taste was left for Virtù, and could stamp a character where ever he deigned to patronize. My author mentions with dutiful sensibility what joy this important protection gave to his father, who had his education warmly at heart, and who dying soon after, left a widow and several children to be supported by our scarce-fledged adventurer. His own words shall tell how he felt his situation, how little the false colours of vanity gave a shining appearance to the morning of his fortune; "I was, says he, the eldest, and then the only one that could help them, which added circumspection in my affairs then, as well as industry to the end of my life."

At intervals of leisure, he practised drawing and music, learned French and a little Italian. It appears that he afterwards acquired Dutch, having consulted in the originals all that has been written in those three languages on the art to which he was devoted.

His works began to draw attention, and he found more illustrious patronage than Kneller's. Lord Somers employed him to engrave a plate of archbishop Tillotson, and rewarded him nobly. The print will speak for itself. It was the ground-work of his reputation, and deserved to be so. Nothing like it had appeared for some years, nor at the hour of its production had he any competitors. Edelinck was dead in France, White in England, Van Gunst in Holland: "It seemed," says he himself, "as if the ball of fortune was tossed up to be a prize only for Vertue." One cannot estimate success at a lower rate, than to ascribe it to accident; the comparison is at once modest and ingenious. Shade of Scaliger, which of your works owed it's glory to a dearth of genius among your contemporaries?

In 1711 an academy of painting was instituted by the chief performers in London. Sir Godfrey Kneller was placed at the head; Vertue was one of the first members; and drew there for several years.

To the end of that reign he continued to grave portraits from Kneller, Dahl, Richardson, Jervase, Gibson, and others..

On the accession of the present royal family he published a large head of the king from a painting by Kneller. As it was the first portrait of his majesty, many thousands were sold, though by no means a laborious or valuable performance. However it was shewn at court, and was followed by those of the prince and princess. All concurred to extend his business. In many recesses from that he practised in water-colours, sometimes attempting portrait; oftener copying from ancient or curious pieces which he proposed to engrave. So early as the year 1713 he commenced his researches after the lives of our artists, and began his collections, to which he added prints by former masters, and every thing that could tend to his great work, the History of the Arts in England. Wherever he met with portraits, of the performers, he spared no pains in taking copies. His journeys over England with the same view will appear in the course of his

his life. These travels were assiduously employed in making catalogues, observations, and memorandums of all he saw.

His thirst after British antiquities soon led him to a congenial Mæcenas. That munificent collector, Robert Harley, second earl of Oxford, early distinguished the merit and application of Vertue. The invariable gratitude of the latter, expressed on all occasions, implies the bounty of the patron. "The earl's generous and unparalleled encouragement of my undertakings, by promoting my studious endeavours," says he, "gave me great reputation and advantage ~~over all other~~ professors of the same art in England." Another lesson of humility. How seldom is fame ascribed by the possessor to the countenance of others! The want of it is complained of—here is one instance, perhaps a singular instance, where the influence is acknowledged—after the death of the benefactor.

Another patron was Heneage Finch earl of Winchelsea, whose picture he painted.

He died in 1726.

ed,

ed, and engraved; and who, being president of the society of Antiquaries on the revival in 1717, appointed Vertue, who was a member, engraver to it. The plates published by that society from curious remains were most of them by his hand as long as he lived, are a valuable monument, and will be evidence that that body is not useless in the learned world.

The University of Oxford employed him for many years to engrave their almanacs. Instead of insipid emblems that deserved no longer duration than what they adorned, he introduced views of public buildings and historic events; for he seldom reaped benefit from the public, without repaying it with information.

Henry Hare, the last lord Coleraine, an antiquary and collector, as his grandfather had been, was enumerated by Vertue among his protectors. His travels were dignified by accompanying those lords. They bore the expence which would have debarred him from visiting many objects of his curiosity, if at his own charge; and he made  
 their

their journies more delightful, by explaining, taking draughts, and keeping a register of what they saw. This was the case in a journey he took with lord Coleraine to Salisbury, Wilton and Stonehenge. Of the latter he made several views: Wilton he probably saw with only English eyes. Amid legions of warriors and emperors, he sought Vandyck and Rubens, Holbein and Inigo Jones. An antique and modern virtuoso might inhabit that palace of arts, and never interfere. An ancient indeed would be a little surprized to find so many of his acquaintance new baptized. Earl Thomas did not, like the popes, convert pagan chiefs into christians, but many an emperor acts the part at Wilton of scarcer Cæsars.

In 1726 Vertue, with Mr. Stephens the historiographer, visited St. Albans, Verulam and Gorkhambury. At the latter he made a drawing from the picture of Sir Francis Bacon.

Great part of his time was employed for lord Oxford, for whom he engraved por-

traits of Mr. Prior, Sir Hugh Middleton, &c. For the duke of Montagu he did Sir Ralph Windwood; for Sir Paul Methuen, Cortez; archbishop Warham from Holbein's original at Lambeth; and for lord Burlington, Zuccherò's queen of Scots.

His prints growing numerous, many persons were desirous of having a compleat collection. He made up sets for Sir Thomas Frankland, for Mr. West, and for lord Oxford; the last in three large volumes, carried down to 1741, and sold after the earl's death to the late earl of Ailesbury for 50 guineas.

In 1727 he went to Wimpole for a week, and thence made a tour with lord Oxford for six weeks more, to Stamford, Burleigh, Grantham, Lincoln, and Welbeck, one of the ancient seats of the counts of Oxford, where after the earl's death she assembled the portraits of her ancestors to a prodigious number, the heroes of many an illustrious race. Thence they passed to Chatsworth, and York, where Vertue had the pleasure of conversing with Mr. Francis Place,

Place, who had been intimate with Hollar. Trifling circumstances to those who do not feel what he felt. Vertue drew up an account of this progress and presented it to his patron.

For some years his stages were marked by noble encouragement, and by opportunities of pursuing his favorite erudition. He was invited whither he would have wished to make pilgrimages, for the love of antiquity is a kind of devotion, and Mr. Vertue had different sets of saints. In 1728 the Duke of Dorset called him to Knowle. Humble before his superiors, one conceives how his respect was heightened at entering so venerable a pile, realizing to his eyes the scenes of many a waking vision. Here he drew several of the poets. But he was on fairy ground; Arcadia was on the confines; could he resist an excursion to Penshurst? One may judge how high his enthusiasm had been wrought, by the mortification he expresses at not finding there a portrait of Sir Philip Sidney.

In 1734 appeared his twelve heads of poets, one of his capital works. Though poetry was but a sister art, he treated it with the affection of a relation. He had collected many notes touching the professors, and here and there in his MSS. are some slight attempts of his own. But he was of too timid and correct a nature to soar where fancy only guides. Truth was his province, and he had a felicity uncommon to antiquaries, he never suffered his imagination to lend him eyes. Where he could not discover he never supplied.

After his poets, of which he proposed to enlarge the series, it was his purpose to give sets or classes of other eminent men. This was the first idea of illustrious heads, a hint afterwards adopted by others, and at last taken out of *his* hands, who was best furnished with materials for such a work. Some branches he executed himself with deserved applause.

About this time he again went to Oxford, copied some original paintings, and took an account of what portraits they have

have of founders and benefactors, and where deposited. Thence to Gloucester to draw the monument of Edward II. having for some years been collecting and making drawings of our kings, from images, miniatures or oil-paintings; a work soon after unexpectedly called forth. On his return he stopped at Burford to view the family-piece of Sir Thomas More, and visited Ditchley and Blenheim. His next tour was to Cambridge, where he had been privately engaged to draw by stealth the portrait of old Mr. Thomas Baker, of St. John's; then an eminent antiquary, earlier in his life the modest author of that ingenious and polished little piece, *Reflexions on Learning*.

Vertue's next considerable production was the heads of Charles I. and the loyal sufferers in his cause, with their characters subjoined from Clarendon. But this was scarce finished, before appeared *Daniel's History of England*, "a work, says he, that had a prodigious run, especially after translated, insomuch that it became all the con-

versation of the town and country, and the noise being heightened by opposition and party, it was proposed to publish it in folio by numbers—thousands were sold every week.” The two brothers, Knaptons, engaged Vertue to accompany it with effigies of kings, and suitable decorations. This undertaking employed him for three years. A fair copy richly bound he presented to Frederic prince of Wales at Kensington. A volume of his best works he gave to the Bodleian library.

In 1734 he renewed his journeys about England. With Roger Gale the antiquary he went to St. Alban’s, Northampton and Warwick. In 1737 the earl of Leicester carried him to Penshurst; and the end of the same year lord Oxford took him again to Oxford, to Compton Verney, the seat of the master of the rolls, to Warwick, Coventry, Birmingham, and to lord Digby’s at Cokhill, to view the curious picture of queen Elizabeth’s procession, since removed by the late lord to Sherborn-castle in Dorsetshire. They returned by Stratford (Vertue.

tue did not want true devotion to Shakespear) by Mr. Sheldon's at Weston, where are a few curious pictures, saw Blenheim, and Mr. Waller's at Beconsfield. The next year he went into Hertfordshire to verify his ideas about Hunston, the subject as he thought of queen Elizabeth's progress. The old lord Digby, who from tradition believed in the queen's procession to St. Paul's, after the destruction of the Armada, was displeased with Vertue's new hypothesis. The same year he saw Windsor and Mr. Topham's collection of drawings at Eton.

.... He next engaged with the Knaptons to engrave some of the illustrious heads, the greater part of which were executed by Houbraken, and undoubtedly surpassed those of Vertue. Yet his performances by no means deserved to be condemned as they were by the undertakers, and the performer laid aside. Some of Houbraken's were carelessly done, especially of the moderns; but Vertue had a fault to dealers, which was a merit to the public: his scrupulous veracity could not digest imaginary portraits, as

are some of those engraved by Houbraken, who living in Holland ignorant of our history, uninquisitive into the authenticity of what was transmitted to him, engraved whatever was sent. . I will mention two instances; the heads of Carr earl of Soimerfet and secretary Thurloe are not only not genuine, but have not the least resemblance to the persons they pretend to represent. Vertue was incommode; he loved truth.

Towards the end of 1738<sup>1</sup> he made another tour with lord Oxford through Kent and Suffex, visiting Rochester, Canterbury, Chichester, Portsmouth, Southampton and Winchester; and the principal seats, as Petworth, Goodwood, Stansted, and Coudray—the last alone worth an antiquary's journey. Of all these he made various sketches and notes; always presenting a duplicate of his observations to lord Oxford.

He had yet another pursuit, which I have not mentioned; no man had studied English coins more; part of his researches have

have appeared in his account of the two Simons. :

He still wanted to visit the east of England. In 1739 his wish was gratified; lord Coleraine, who had an estate at Walpole in the borders of Norfolk in Lincolnshire, carried him by Wansted, Mowtham, Gosfield, St. Edmundsbury, Sir Andrew Fountain's and Houghton, to Lynn, and thence to Walpole; in which circuit they saw many churches and other seats.

In 1740 he published his proposals for the commencement of a very valuable work, his historic prints, drawn with extreme labour and fidelity, and executed in a most satisfactory manner. Queen Elizabeth's progress he copied exactly in water-colours for lord Oxford, who was so pleased with it, that he sent Mr. Vertue and his wife a present of about 60 pounds of plate—but they arrived at the summit of his modest wishes, that is, rewarded for illustrating English history—his happiness was suddenly dashed; he lost his noble friend the earl, who died June 16, 1741. “Death, says he emphatically,

cally, put an end to that life that had been the support, cherisher, and comfort of many, many others, who are left to lament—but none more heartily than Vertue !”

So struck was the poor man with this signal misfortune, that for two years there is an hiatus in his story—he had not spirits even to be minute.

In 1743 he was a little revived by acquiring the honour of the duke of Norfolk’s notice, for whom he engraved the large plate of the earl of Arundel and his family. For his grace too he collected two volumes of the works of Hollar, chiefly of those graven from the Arundelian collection; and having formed another curious volume of drawings from portraits, monuments, pedigrees, &c. of the house of Howard, the duke made him a present of a bank note of £500.

His merit and modesty still raised him friends. The countess dowager of Oxford alleviated his loss of her lord: their daughter the duchess of Portland he mentions with equal gratitude; the late duke of Rich-

Richmond and lord Burlington did not forget him among the artists they patronized. But in 1749 he found a yet more exalted protector. The late prince of Wales sent for him, and finding him master of whatever related to English antiquity, and particularly conversant in the history of king Charles's collection, which his royal highness wished as far as possible to re-assemble, he often had the honour of attending the prince, was shewn his pictures by himself, and accompanied him to the royal palaces, and was much employed in collecting prints for him, and taking catalogues, and sold him many of his own miniatures and prints.

He had now reason to flatter himself with permanent fortune. He saw his fate linked with the revival of the arts he loved; he was usefull to a prince who trod in the steps of the accomplished Charles; no Huysumers threatened havoc to the growing collection—but a silent and unexpected fog drew a veil over this scene of comfort, as it had over the former. Touched yet submissive, he says, after painting the prince's  
quali-

qualifications, and the hopes that his country had conceived of him, — “but alas, *Mors ultima rerum!* O God, thy will be done! Unhappy day, Wednesday March 20th, 1751!” His trembling hand inserts a few more memorandums of prints he engraved, and then he concludes his memoirs in melancholy and disjointed sentences thus, — “Observations on my indifferent health — and weakness of sight increasing — and loss of noble friends, and the encouragement from them less and less daily — this year — and worse in appearance begins with 1752.”

He lost his friends; but his piety, mildness, and ingenuity never forsook him. He laboured almost to the last, solicitous to leave a decent competence to a \* wife with whom he had lived many years in tender harmony. His volumes of the works

\* Margaret his wife survived him, and died March 17, 1776, in the 76th year of her age. His brother James, who followed the same profession at Bath, died about 1765.

of Hollar and the Simons, I have mentioned here and elsewhere. The rest of his works will appear in the ensuing list.

He died July 24th, 1756, and was buried in the cloysters of Westminster-abbey on the 30th following, with this epitaph,

Here lyes the body of George Vertue

Late engraver

And fellow of the Society of Antiquaries,

Who was born in London 1684,

And departed this life on the 24th of July 1756.

With manners gentle, and a gratefull heart,

And all his genius of the Graphic Art,

His fame shall each succeeding artist own

Longer by far than monuments of stone.

Two other friends—not better poets indeed,—inserted the following lines in the papers, on viewing his monument :

Proud artist, cease those deeds to paint on stone,

Which far above the praise of man have shone :

Why should your skill so vainly thus be spent :

For Vertue ne'er can need a monument.

Another,

## Another,

Troubled in mind and press'd with grievous smart,  
 Her happy mansions left the Graphic Art,  
 And thus to Science spoke; "what! can it be?  
 "Is famous Vertue dead!—then so are we."

These are well-meant hyberboles on a man who never used any; he was simple, modest, and scrupulous; so scrupulous, that it gave a peculiar slowness to his delivery; he never uttered his opinion hastily; nor hastily assented to that of others. As he grudged no time, no industry, to inform himself, he thought they might bestow a little too, if they wished to know. Ambitious to distinguish himself, he took but one method, application. Acquainted with all the arts practised by his profession to usher their productions to the public, he made use of none. He only lamented he did not deserve success, or if he missed it when deserved. It was some merit that carried such bashfull integrity as far as it did go.

He was a strict Roman Catholic; yet even those principles could not warp his attachment to his art, nor prevent his making it subservient to the glory of his country. I mention this as a singular instance. His partiality to Charles the first did not indeed clash much with his religion; but who has preserved more monuments of queen Elizabeth? Whatever related to her story he treated with a patriot fondness; her heroes were his. His was the first thought of engraving the tapestry in the House of Lords; not a project of giving a series of protestant bishops—for his candour could reconcile toleration and popery.

His collection of books, prints, miniatures and drawings were sold by auction May 17th, 1757. Lord Besborough bought there his copies in water-colours of the kings of England, as I did a large piece of Philip and Mary from the original at Woburn, which he intended for his series of historic prints; there too I purchased his drawings taken from Holbein; and since his death, the best piece he ever painted, a small whole

5

whole-length of the queen of Scots in water-colours.

The length of this account I flatter myself will be excused, as it contains a few curious particulars, which are not foreign to the subject, and which concomitantly illustrate the history of arts.
